Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I object to this proposal for the following reasons: Adverse visual impact on public space - the development will result in substantial visual intrusion into the surrounding

countryside and public viewpoints.

The development poses a significant threat to local biodiversity including destruction of habitats for protected species

Destruction of historic hedgerows deminishing the character of local landscape

Previous rejection of an application for this area on similar grounds

Concern that if this development is approved further developments would also be approved in this space.

Lack of awareness from the developer outlining their proposal. As a resident of greenlands drive who would be severely impacted by noise and building works, not leaflet or information was received from the developer explaining their proposal.

Kind regards
