Comments Details

Comments:	Having examined the data at our disposal concerning this site, I have not encountered any indications or information suggesting that the land in question might be contaminated. Therefore, based on the mapping data currently available, I do not have any specific comments regarding the possibility of contaminated land. However, it is important to note that the absence of evidence is not necessarily evidence of absence, and the developer should be aware that there may still be potential risks or hazards associated with the land that are not apparent from the available data.
