11 Barnfield - Proposed Parking Plan (1.50 A4 Scale) v2.pdf
57 KB

Hi Peter,

Thanks for coming back to me.

Please find attached the updated plan. I've rechecked the measurements and corrected the slight discrepancy in the scaling so that the plans accurately reflect the measurements taken on site.

Regarding the apple tree, unfortunately there isn't a suitable location within the front garden that would allow the proposed parking arrangement to be provided while retaining the tree there.

The intention is therefore to relocate the existing apple tree to the rear garden during the next suitable planting season, anticipated to be January/February 2027. As the proposed location is within the rear garden, it falls outside the extent of the attached driveway plan.

I hope this provides everything you need, but please let me know if you require any further information regarding the proposed tree location. Also, happy to discuss in person if you wanted to undertake a site visit.

Kind regards,

James

Hi Peter,

Just one additional point on the apple tree which I forgot to mention.

As you can see from the attached photo, it drops quite a lot of apples directly onto our car and the neighbouring parking area. We've already had apples land on the cars and cause damage, so relocating it to the rear garden would also help avoid this continuing. An apple tree positioned here was probably not the best decision by the developer.

Just thought it was worth mentioning for a bit of additional context.

Thanks,

James
