Description

Please describe details of the proposed development or works including any change of use

There was an adjacent disused garage area. There was already a doorway into the area but this had previously been boarded up with studwork, so access through was easy. We contacted our landlord and he was in agreement that we could convert the space into a useable office space. There was no structural work needed, we merely had to remove the old wooden folding door-set to the front. These were old, in need of replacement and had peeling paint. This was to be replaced using a wide window built into a timber framework with marine ply and painted in a subtle grey. Internally, the electrics were updated, with power points, LCD low energy strip lights and data added. The walls and ceilings were drylined and decorated. Floor levelling compound was used and the floor was finished with carpet tiles. The neighbours have commented how the change has improved the outlook from their properties.

The front of the existing garage comprised of timber folding doors. These were originally painted in a black paint. This was faded and peeling. The doors were showing signs of decay along the lower edges. The hinges had seized and would not operate as they should have done.

Proposed materials and finishes:

The old doors were removed and courses of bricks and a dpc were added. A timber studwork frame was added using treated timber with insulation between the studwork. An aluminium four pane window was added. Then marine play was added to the face and 12.5mm plasterboard to the internal. The exterior was primed, undercoated and two coats of top coat in a mid-grey, all were exterior grade paints.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:
Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:
Zero impact, conversion of an existing space by cladding the interior.

Note: Please read the help text for further information why developments may be exempt or not in scope.
