Dear Peter,

I would like to object to above application for doors and windows to this existing warehouse. I cannot understand why they are required unless it's for a change of use from commercial to possibly 3 private residences.

My objections are:-

We will be overlooked by the south facing windows affecting our privacy.

As access to the warehouse is I believe by a footpath only, our close will probably suffer from congestion caused by deliveries of materials and workers etc.

I think a site visit would illustrate better the difficulties of supply and damage to the wildlife in this conservation area.

Yours sincerely,
