Please identify the tree(s) and provide a full and clear specification of the works you want to carry out	The tree is an established Yew which has not had any maintenance to it in at least the last 20+ years. The request is to reduce the height by approx 3 metres to increase light into the applicants garden. Also to even up the branch length to give the tree a better shape and to reduce the length of some upper branches overhanging applicants garden. The Yew has suffered from another tree which has since died growing alongside it. This restricted the growth on one side of the Yew which has resulted in it leaning into the applicants garden with the weight of branches on that side
