Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

The proposed development relates to the change of use of an existing commercial unit within a town centre location, together with minor external works including signage and a temporary removable display shelf. The site is fully developed and comprises hard surfaces with negligible ecological value. The proposal does not involve any ground works or impact on existing habitats. Therefore, the development does not affect any priority habitat and any potential impact on biodiversity is negligible and well below the de minimis threshold.

Note: Please read the help text for further information why developments may be exempt or not in scope.

Waste Storage and Collection

Do the plans incorporate areas to store and aid the collection of waste?

- ☒ Yes
☐ No

If Yes, please provide details:

Waste will be stored within the premises and presented for collection via the existing local authority waste collection service.

The layout allows for the convenient movement of waste to the collection point, ensuring that waste storage and collection can be managed efficiently. Given the small scale of the retail use, waste generation will be limited.

Have arrangements been made for the separate storage and collection of recyclable waste?

- ☒ Yes
☐ No

If Yes, please provide details:

Recyclable waste will be separated from general waste and managed through the standard local authority collection system. The premises will utilise council-provided facilities for the disposal and collection of recyclable materials such as cardboard and plastic.

Waste will be stored appropriately within the premises and presented for collection in accordance with local authority requirements. Due to the nature of the use as a small retail convenience store, recyclable waste is expected to be limited and manageable.
