Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	This property is a semi detached property and I am the direct neighbour. The proposal of the development would impact my family my property the surrounding area. There would be impact on our property as far as a loss of outlook from our windows and from our garden. It would be overbearing over our property and due to the movement of the Sun would impact our light during the day. The

work which would be carried out on our house would directly impact our property as well due to the increased noise and soil disturbance. The properties are over 150 years old and I would be concerned about how the construction would preserve the integrity of the buildings. the increase of business as far as the extension of the commercial premises on the ground floor would impact the footfall of people outside our house would increase the noise of people accessing the business which would be detrimental to our well-being. The property already has a number of cars which are associated to the address due to the number of occupants within the house , I am concerned that the increase of the occupation within the house would impact the local area due to the increase of vehicles. The garden space out the back of the property offers peace and quiet and seclusion in away from the main road, increasing the size of the property next door to our garden would impact that. This is an conservation area. I strongly oppose there being an increase of property next to our home.

Kind regards
