Subject: Application No:DM/25/2612

[REDACTED]

Dear Sir or Madam.

I received a Planning Application today for Franklands Village Store, Franklands Village, Haywards Heath, West Sussex. No; DM/26/2612.

I have been on the planning register and it is not showing any details of the application.

The store has already fitted Conditioning/Chillers to the western flank of the store. (Without planning permission, as I have not seen it.)

I would like to appeal against any extra being added to the existing, and would request that if they are granted, I would like them and even the existing condensers be built in to a structure of some kind. These units run all day and all night. I live opposite the Store and the sound can be heard on start up, especially at night time when we are trying to sleep.

I would like the Planning denied, under the issue of Significantly increased noise and disturbance, unless an alternative position can be found, i.e. Southside of Store, and that they are soundproofed.

I await your reply.

Kind Regards
