Dear Andrew,

Based on you being satisfied that the information regarding discharge rates was provided at the application stage of planning, please find below our updated comments:

The Flood Risk and Drainage Team are satisfied that sufficient information has now been provided for condition 10 and therefore we have no objections.

Although the applicant does not believe they require any permissions for the existing watercourse on the site, we would recommend this is still flagged to West Sussex as it is labelled as an inland watercourse. West Sussex can then advise the applicant accordingly.

Best Wishes
