1 Introduction

YES Engineering Group Ltd has been instructed by Ash Properties Limited to prepare a Transport Technical Note (TN) to respond to West Sussex County's comments on the continued use of the site for airport parking at Unit 3A Acacia Grove, Copthorne Road, Copthorne Crawley, West Sussex RH10 3PD, hereafter referred to as the 'Site'.

As shown in **Figure 1.1**, the Site is situated on the northern side of Copthorne Road.

Figure 1.1 – Location Plan

The Site is within the administrative authority of Mid Sussex District Council (MSDC) and West Sussex County Council (WSCC) are the highway authority.

1.1 Development Proposals

The site is currently used as long stay parking for Gatwick Airport and a planning application has been submitted for its continued use. The car parking layout is shown on the Architects plans at **Appendix A**.

1.2 West Sussex County Council Consultation

Mid Sussex District Council (MSDC) consulted West Sussex County Council (WSCC) as the highway authority for their comments on the retention of the long stay car park. The full response from WSCC is attached at **Appendix B**.

WSCC requested the follow information to be supplied so they could further assess the impact on the public highway:

- *Dimensioned access drawings including achievable visibility splays and any proposed widening at the pinch point;*
- *7 day automated speed survey to determine acceptable visibility splays;*
- *Total number of parking spaces applied for;*
- *An estimation of traffic generated by the use. It would be helpful to provided more information on how the operation will work. How will member of staff get to Gatwick/return to site? Will customers ever meet at site and be chauffeured to Gatwick as a designated drop off at Gatwick may not be available? and*
- *Hours/days of operation i.e. 247/365 days per year?*

1.3 Scope of the Technical Note

Following this introduction, the Technical Note is set out in the following manner:

Section 2.0, Baseline Conditions: Describes the site, the local highway network. Investigates the infrastructure and services available for visitors to the Site travelling via alternative modes of transport to the private car.

Section 3.0, Access Arrangements: Provides a summary of the access arrangements including visibility assessment.

Section 4.0, Summary and Conditions: Provides a summary of the report and draws together its conclusions.

2 Baseline Conditions

2.1 Existing Land Use

The site is currently used as long stay parking for Gatwick Airport and a planning application has been submitted for its continued use.

The site is located within an industrial site with various other uses.

2.2 Local Highway Network

As shown in **Figure 1.1**, the Site is situated on the northern side of Copthorne Road. Copthorne Road (A220) is a classified road subject to a 50mph speed limit. There is a small section of informal pedestrian track to the west of the site access and another small section of footway to the east of the garage.

As per WSCC consultation response, a 7-day automatic traffic count (ATC) was undertaken to determine the speed of traffic along Copthorne Road. Traffic counters were placed approximately 210m either side of the existing access to ascertain both the speed and volume of traffic. The results are attached at **Appendix C** and summarised below.

		Channel: Southwestbound	Wed 17-Jan-24	Tue 23-Jan-24		39222	5898	5603	44.7	39.8

Tables 2.1 and 2.2 both confirm that the speed of travel along Copthorne Road is significantly below the speed limit of 50mph, with an average speed of just 40mph and an 85th/ile of 46mph. Consequently, the visibility splays requirements from the access can be reduced accordingly.

In addition to the ATC surveys along Copthorne Road, a 12-hour survey of the site access was undertaken to understand the volume of traffic entering and exiting the site. The results confirm that in the AM peak hour there were just 5 vehicles exiting and 10 entering the site, whilst in the PM peak hour there were 6 vehicles exiting and 5 entering the site. This confirms the number of vehicles entering/exiting the site would have a minimum effect on the public highway. A full set of survey results are attached at **Appendix D**.

3 Access Arrangements

3.1 Visibility Assessment

As requested by WSCC a 7 day automated speed survey was undertaken to determine acceptable visibility splays in accordance with the 85th/90thile speed. As set out in **Table 2.1/2.2** the 85th/90thile recorded along Copthorne Road is 46mph, well below the speed limit of the road.

The required stopping sight distance for 46mph is 130m as set out below.

* for simplicity, gradient will be given as zero where details of levels are unavailable and observed gradients are deemed to be insignificant in terms of the effect on vehicle braking

Figure 3.1 attached to the rear of this document confirms that visibility splays of 130m can be achieved in either direction within land owned by WSCC. This assessment was made using a topographical survey for maximum accuracy.

3.2 Access Width

The existing access is an informal bell mouth design with a short section of low kerbing to the west of the access.

As shown on **Figure 3.1** the existing access measures over 10.5m in width adjacent to Copthorne Road before reducing down to around 5.4m in width further within the site. This demonstrates that the access is more than adequate for two vehicles to pass one another without needing to wait on carriage.

The vehicular surveys of the site access also confirm that in the AM peak hour there were just 5 vehicles exiting and 10 entering the site, whilst in the PM peak hour there were 6 vehicles exiting and 5 enter the site. As set out above the geometry of the access is more than adequate to accommodate the level of traffic.

3.3 Parking

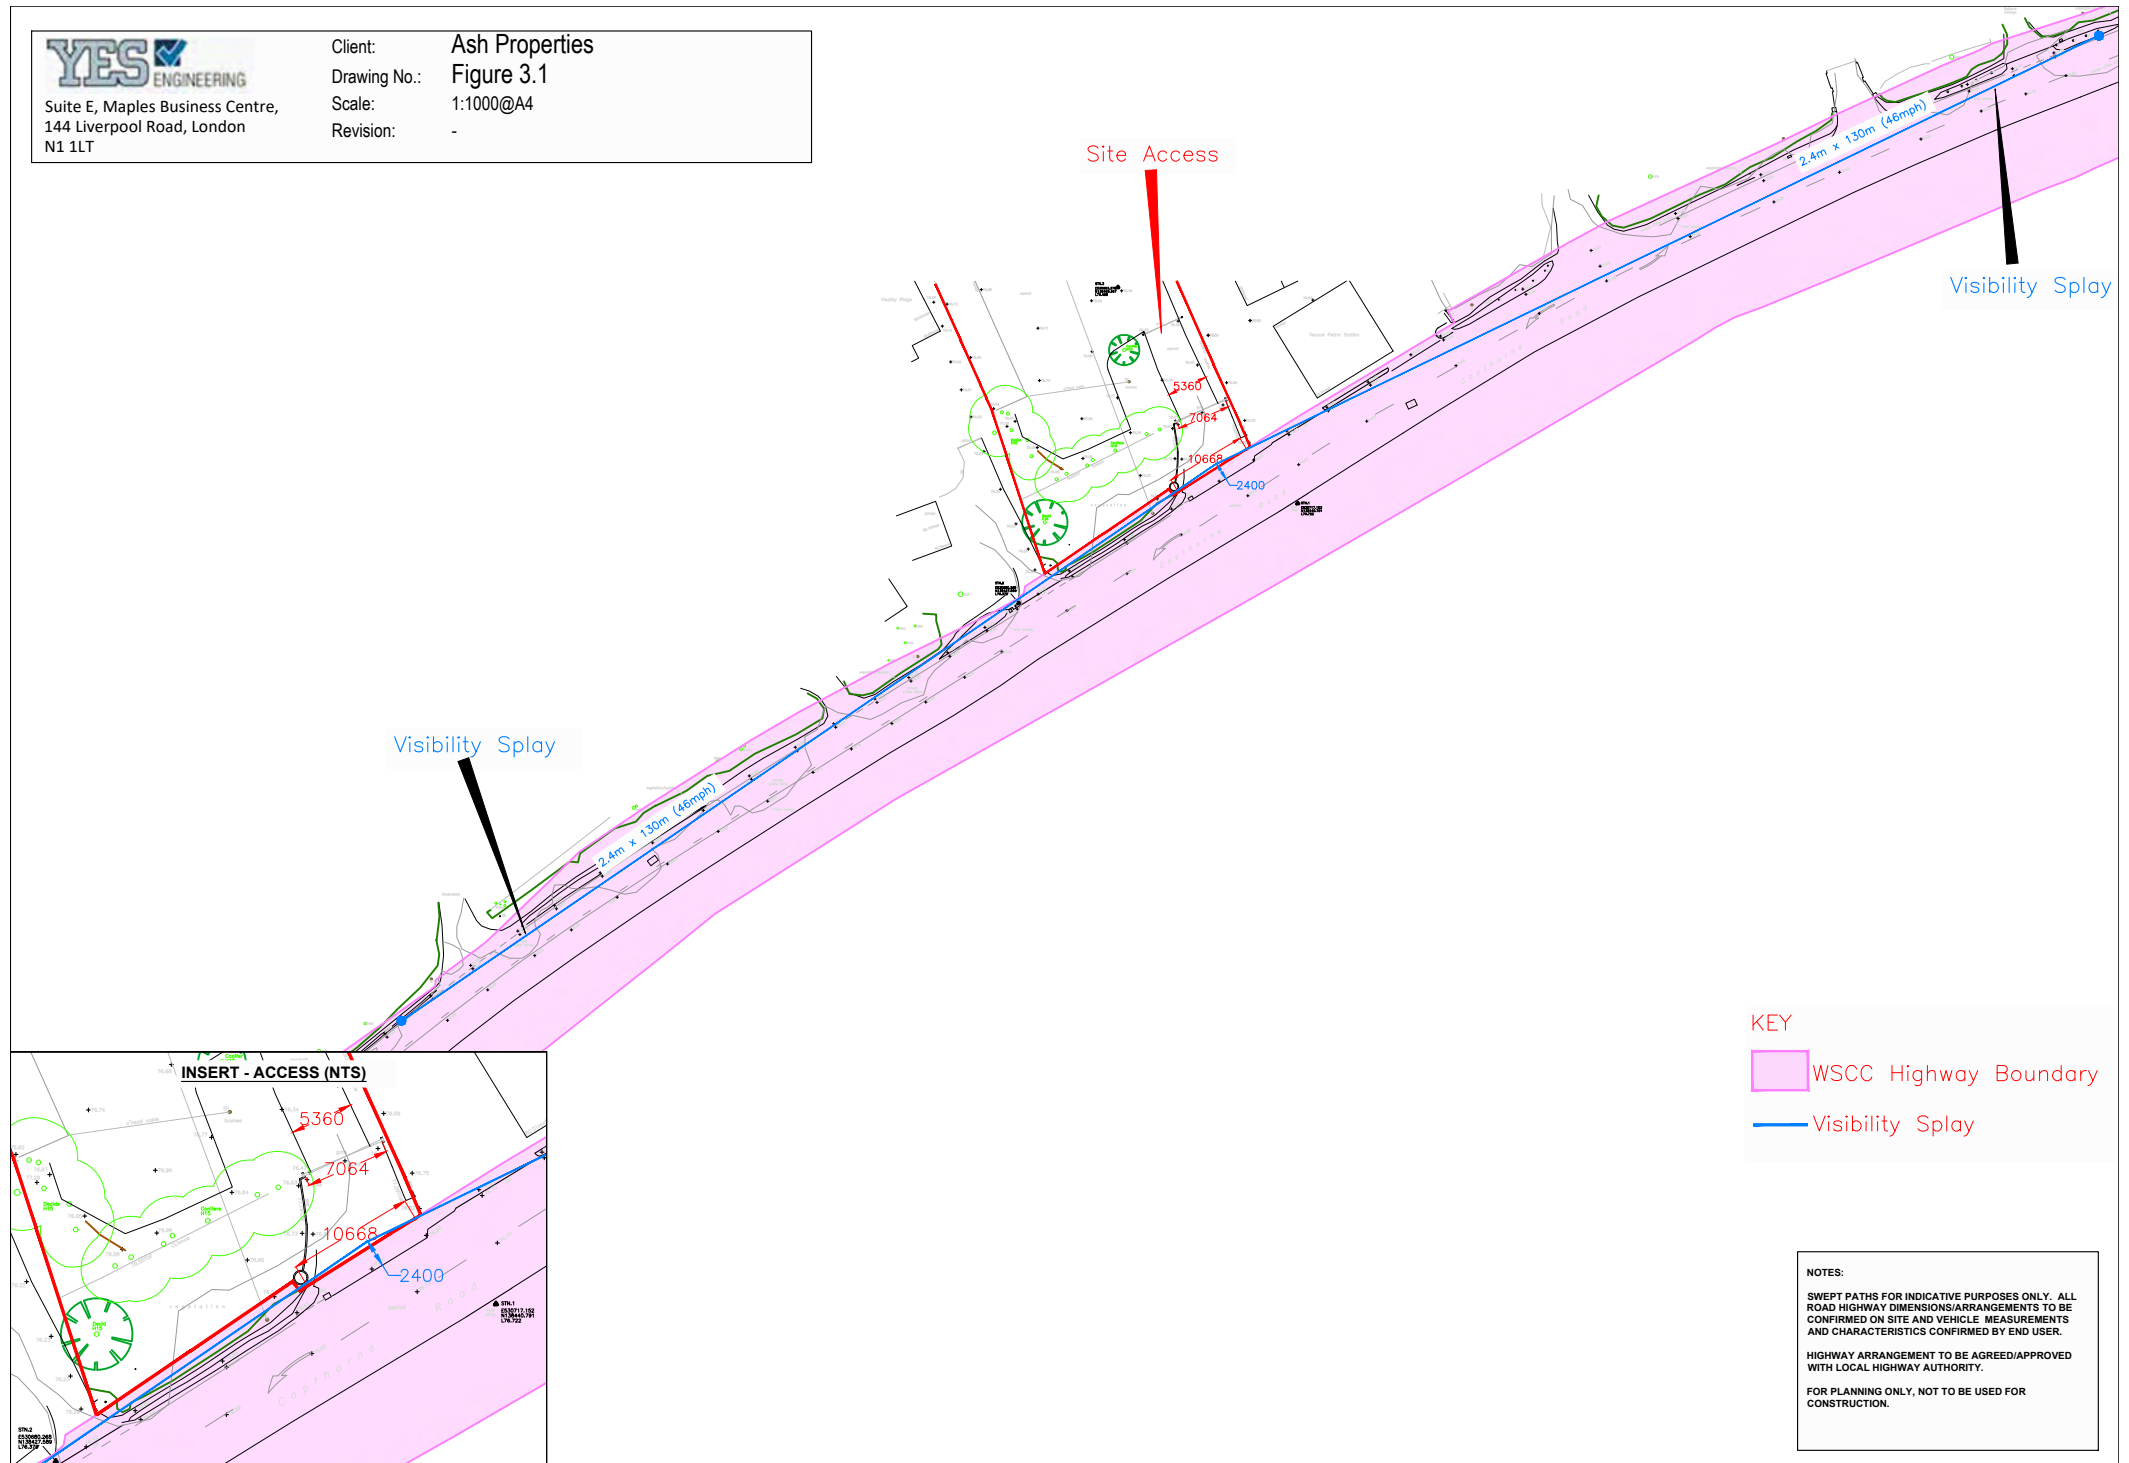

The parking layout is attached at **Appendix A**.

4 Summary and Conclusions

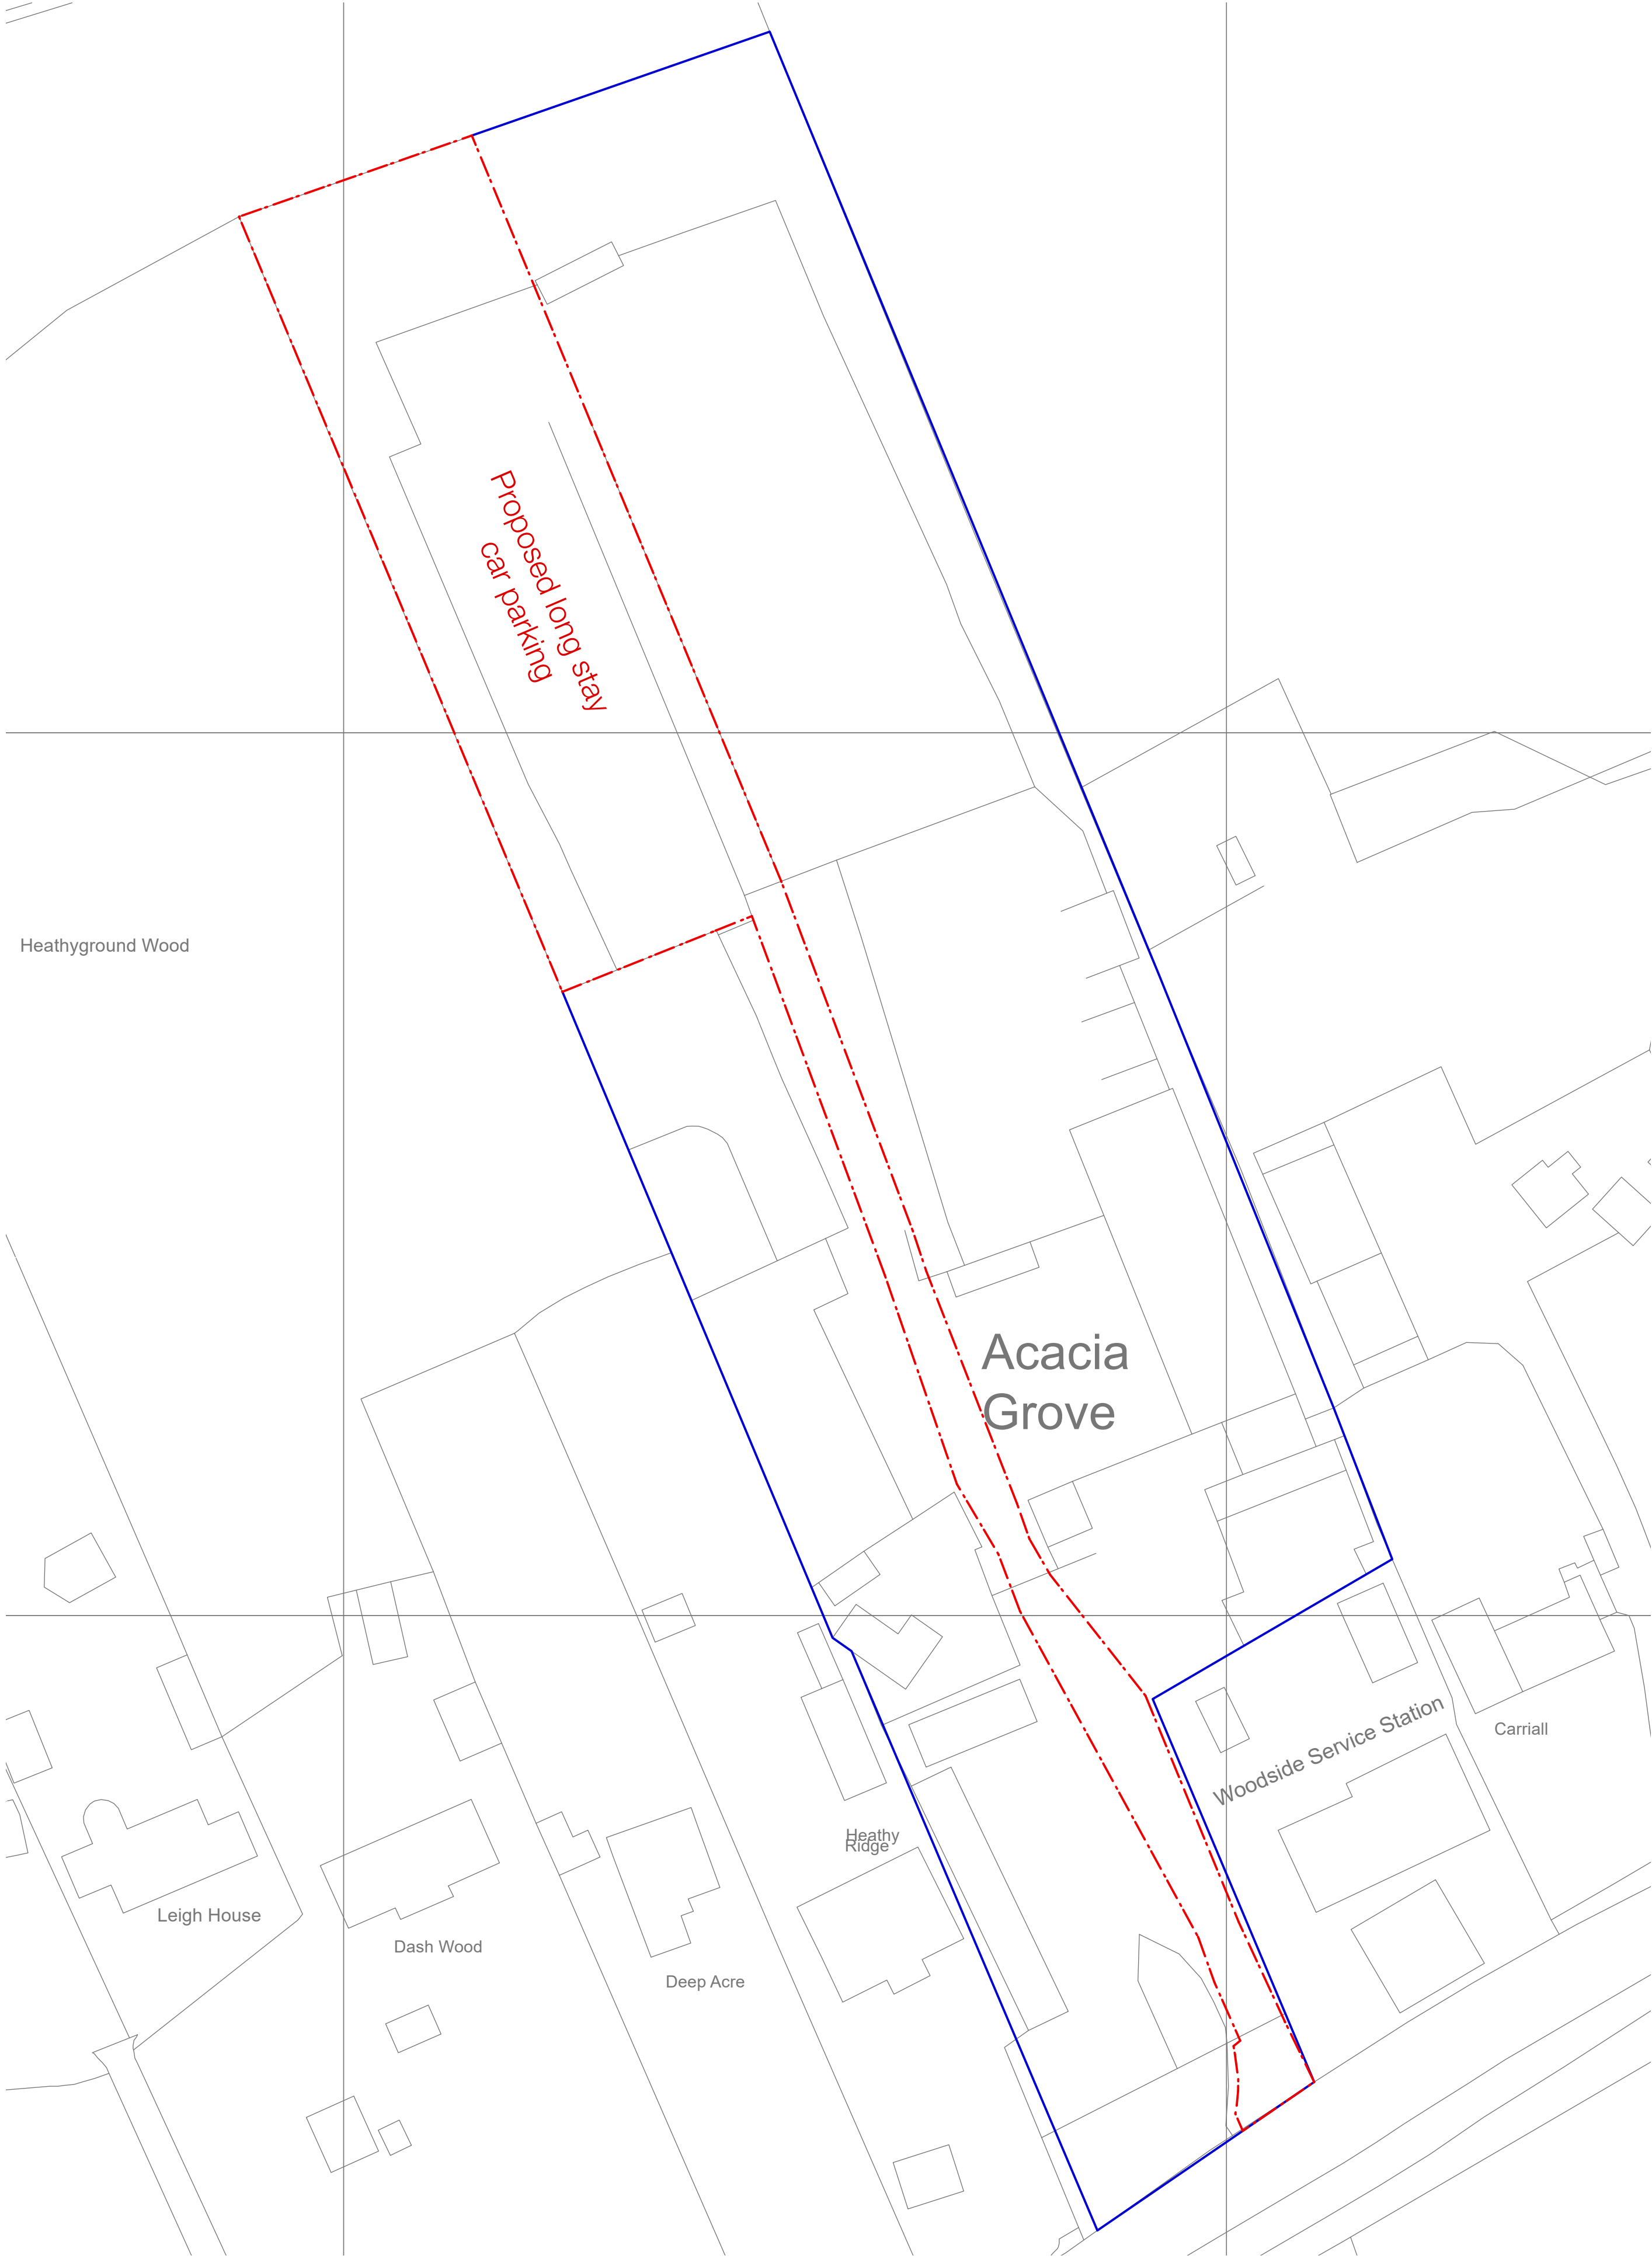

- a** YES Engineering Group Ltd has been instructed by Ash Properties Limited to prepare a Transport Technical Note (TN) to respond to West Sussex County's comments on the continued use of the site for airport parking at Unit 3A Acacia Grove, Copthorne Road, Copthorne Crawley, West Sussex RH10 3PD.
- b** **Tables 2.1** and **2.2** both confirm that the speed of travel along Copthorne Road is significantly below the speed limit of 50mph, with an average speed of just 40mph and an 85th/90thile of 46mph. Consequently, the visibility splays requirements from the access can be reduced accordingly.
- c** **Figure 3.1** attached to the rear of this document confirms that visibility splays of 130m can be achieved in either direction (requirement for 46mph) within land owned by WSCC.
- d** The vehicular surveys of the site access also confirm that in the AM peak hour there were just 5 vehicles exiting and 10 entering the site, whilst in the PM peak hour there were 6 vehicles exiting and 5 enter the site.
- e** As shown on **Figure 3.1** the existing access measures over 10.5m in width adjacent to Copthorne Road before reducing down to around 5.4m in width further within the site. This demonstrates that the access is more than adequate for two vehicles to pass one another without needing to wait on carriage.
- f** NPPF paragraph 115 states that '*development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.*' As demonstrated within this report the impacts are not severe.
- g** Overall, it is concluded that there is no highway or transportation reasons to object to the continued use as a car park.

WEST SUSSEX COUNTY COUNCIL CONSULTATION

TO:	Mid Sussex District Council FAO: Hamish Evans
FROM:	WSCC - Highways Authority
DATE:	8 December 2023
LOCATION:	Unit 3A Acacia Grove Cophthorne Road Cophthorne Crawley West Sussex RH10 3PD
SUBJECT:	DM/23/2493 Retention for use of site as long stay airport car parking (Sui Generis). (Address amended 26.10.2023)
DATE OF SITE VISIT:	n/a
RECOMMENDATION:	Objection / More Information
S106 CONTRIBUTION TOTAL:	n/a

I refer to your consultation in respect of the above planning application and would provide the following comments.

Limited information has been provided to support this application. Our comments are based on the following information:

- Proposed Site Plan 2133 - DS - XX - GF -DR- A - P002 rev 0
- Planning Statement
- Application form
- Electronic mapping

Proposal

The proposal is for the use of the site as along stay car park for Gatwick Airport which is 7km from the site. No detailed information has been provided on the number of car parking spaces applied for on site. The site plan shows a number of tandem parking bays to the north/west of the site which could store a minimum of 132 vehicles, however the application form states 3435 sqm and there are other areas on the site which parking may take place. It is also difficult to ascertain likely traffic generation for the proposal as vehicles may be stored for differing lengths of time. It is understood from the planning statement that 15 staff will be employed on-site and a number of these will collect vehicles from the airport to be stored on site and returned to Gatwick on customers return.

Site Location

Cophthorne Road (A220) is a classified road subject to the national speed limit. The road is well trafficked and provides an alternative link from the east of Crawley to the the A264 distributor. The is a small section of informal pedestrian track to the west of the site access and another small section of footway to the east of the garage.

The site is located on the north side of Copthorne Road on an existing industrial site with a number of existing business operations. The access is adjacent to another access which serves a fuel station and a small shop.

Vehicle Access

The existing access is an informal bellmouth design with a short section of low kerbing to the west of the access. The first 5m (approx) is of a width that could accommodate passing vehicles, however there is a pinch point which reduces the width and may result in a vehicle waiting to allow another to pass. There appears to be scope within the site to widen this point to allow for a free flow of vehicles and avoid any back up onto the public highway. A widening at this point would be recommended.

Visibility from the access appears to be below standard and DMRB standards would be recommended in this location requiring 210m splays. However a speed survey could be provided to determine the level of visibility required based on actual 85%ile speeds which may be lower than the posted limit.

Traffic generation

It is not possible to establish, with the information provided, the level of traffic that this proposal would generate and therefore the impact it would have on the public highway.

The following information would therefore be required:

- Dimensioned access drawings including achievable visibility splays and any proposed widening at the pinch point
- 7 day automated speed survey to determine acceptable visibility splays
- Total number of parking spaces applied for
- An estimation of traffic generated by the use. It would be helpful to provided more information on how the operation will work. How will member of staff get to Gatwick/return to site? Will customers ever meet at site and be chauffeured to Gatwick as a designated drop off at Gatwick may not be available?
- Hours/days of operation ie 247/365 days per year?
