WSSC Highways has raised the question with us of the possibility of a second footpath to the north of the site access. My understanding is that it is something they would prefer to see, but not an absolute requirement to make the access acceptable. We understand WSSC's view but this naturally comes from a single perspective of highway design. The Crest team spent many months exploring the best way to access the site balancing ALL aspects of the site and constraints. Some of these options were discussed with WSSC Highways during pre-application discussions earlier this year.

The best option, which provides a safe access with minimal impact on the PROW, trees, ancient woodland and ecology whilst also providing for sustainable drainage and utilities is the design in the submitted application. The planning balance is set out in the Planning Statement and summarised in Section 8; therefore, Crest is not willing to explore this further.

We hope you find this information addresses the issues raised.

We would welcome a meeting with you, at your earliest convenience, to discuss these amendments, any other outstanding statutory consultee responses and to discuss a potential committee target date. Please let me know when is convenient for you.

Yours sincerely
