

Diagram of a building with a gabled roof and horizontal siding. A label "Timb" points to a small circle on the right side of the building.

A line drawing of a house. The roof is a simple triangle with horizontal lines inside, suggesting shingles. The walls are also covered in horizontal lines, representing siding. The house has a rectangular base and a small chimney on the right side of the roof.

A diagram of a house with a slate roof and vertical cladding. The roof is labeled "Slate roof to". The house has four vertical sections of cladding, each with a small square window near the top. The roof is a simple gable shape, and the cladding is represented by vertical lines.

A line drawing of a house with a gabled roof and horizontal siding. The roof is filled with a light gray pattern of horizontal lines. The walls are also filled with a light gray pattern of horizontal lines. The house has a central vertical element, possibly a chimney or a door, and a small rectangular window on the left side. The base of the house is represented by a brick pattern.
