[REDACTED]
Dear Ms Williams,

Regarding the Macar development on the land south of St Stevens Church, Hamsland, Horsted Keynes.

I wish to express my OBJECTION to the proposed external lighting scheme in this application. I note this was not in the original application, so I am at a loss as to why the developers find street lighting necessary now. There are already many objections to this proposal which go into far more detail about AONB's, "Dark Sky's" etc than I could ever hope to do.

My objection is that Horsted Keynes has existed for 100's of years without street lighting, and I fail to see why it should be introduced on this new development. I would point out that the last development in the village - Hillcrest, while not on the same scale as this development, did not find it necessary to have street lighting. If this application goes ahead, it sets a very unwelcome precedent for any future developments.

Please take my objection into account when considering this application.

Kind Regards,
