Please identify the tree(s) and provide a full and clear specification of the works you want to carry out	REFERENCE - BH/05/TPO/78 The Oak tree has been inspected by a tree surgeon and needs to be felled (monolift). It's recently shed a large limb and the specialist has said that they can see it's shed a few in the past. It is believed that it is dry rot that caused this limb to fail which is likely spreading throughout the tree. The trunk (fence side) is rotting and the bark is peeling away. Being in close proximity to the garden, house and fence they have deemed this tree extremely unsafe Irene Fletcher has attended site and reviewed the tree as well, agreeing with the above.
