

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

1. Submission details

1.1 Date

For example, 3/11/2023

15/07/2026

1.2 Planning application reference number

1.3 Local planning authority (LPA)

Mid Sussex District Council

1.4 Development site address

If the site does not have an address, enter the OS grid reference.

94, 94a, 96 And 98 London Road, East Grinstead, West
Sussex, RH19 1EP

1.5 Describe the development

Tell us about the proposed development and any changes of use (250 words).

The construction of two units, a single-storey and two-storey attached structure, and new areas of vegetated garden.

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

☒ Yes

☐ No

4.2 If no, what earlier date did you agree with the LPA?

N/A

4.3 How have you met the guidance on 'what counts towards your BNG'?

Find out what you can count towards a development's BNG

All enhancements that have resulted in the achieved net gain have been included purely for the purposes of BNG. There are no other schemes for the project that affect habitat.

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

The site largely comprises developed land; sealed surface and vegetated garden. Additionally, there are eight small trees within the garden, however in line with guidance they have been excluded from this BNG assessment due to being 'small' size and within a private garden.

A large area of vegetated garden will be lost to the development of the new units, the surrounding area will be retained as vegetated garden, and no enhancements have been included.

No irreplaceable habitats are present within the site. All habitats are considered to be of low conservation value and therefore impacts are not significant.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

☒ Yes

☐ No

4.6 How will you achieve the target net gain percentage?

☐ On-site

- ☒ Off-site
☐ Both

4.7 Are any of your on-site enhancements considered 'significant'?

Find out what counts as a significant on-site enhancement.

- ☐ Yes
☒ No

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

N/A

4.9 How many off-site biodiversity units do you need to meet 10% net gain?

0.15

4.10 Explain why you're using off-site biodiversity units

Only answer this question if you're planning to use off-site biodiversity units (250 words).

No specific ecological enhancements can be included on-site, since all vegetated areas will be within private gardens.

4.11 Explain why you're planning to use statutory biodiversity credits

Only answer this question if you're planning to use statutory biodiversity credits (250 words).

N/A

4.12 Do you have a habitat management and monitoring plan?

- ☐ Yes
☒ No

4.13 Have you used the statutory biodiversity metric tool?
