Hi Anna,

Regarding the AC unit, addressing this to meet the requirements is on my list; I simply have not had a chance to return to it yet.

I will also look into addressing the surface water flooding, which may require input from a third-party consultant. Before I engage a consultant, could you confirm if you would be in support of the proposal, subject to satisfactorily resolving the acoustic and flooding issues?

Additionally, I agree to an extension of time.

Many Thanks,

Scott Ellisdon

Good morning Scott

Please see attached the comments I received yesterday from the Flood Risk & Drainage Team for the above application.

As you will see they have requested further supporting information to assess the impact the proposed development on existing flood risk to the site/the surrounding area, and require a proposed surface water drainage strategy for the development. Please can you confirm if your clients will be willing to provide this further information?

Whilst writing I shall be grateful if you can also provide an update with your client's reaction to the content of my email of 08.09.2026 (see attached)?

I note that the Decision Target Date for the application is currently 01.10.2026. If further information and/or amended plans are to be submitted it is likely that I will need to request agreement to an Extension of Time (EOT).

I plan to visit the site next Wednesday or Thursday, when I shall be in the area. I will confirm nearer the time next week, as I will require access to the rear of the house.

I look forward to hearing from you.

Regards

Anna Tidey
