

Log Piles Piles- c.30cm hole to be dug and wood of varying sizes to be stacked to a height of c.50cm above ground level.

Excavated soil to be added on top of the pile.

Bird Boxes - 2 x 1SP Schwegler Sparrow Terrace (or equivalent)

Bat Boxes - 2 x 1FQ Schwegler Bat Roost (or equivalent)

BIODIVERSITY ENHANCEMENT STRATEGY

Purpose and Objectives

The purpose of the proposed biodiversity enhancements is to provide additional nesting, roosting and refuge opportunities for wildlife associated with the site and to contribute to local biodiversity in accordance with the approved development.

Enhancement Measures

- 2 No. integrated or surface-mounted bat boxes installed on retained buildings or suitable mature trees.
- 2 No. bird nesting boxes suitable for common garden bird species installed on retained trees or buildings.
- 3 No. deadwood habitat pile constructed using timber and woody arisings generated during site clearance and landscaping works.

Locations

The locations of all biodiversity enhancement measures are shown on this drawing.

Implementation

All enhancement measures shall be installed under the supervision of the developer and in accordance with the manufacturer's specifications prior to occupation of the development.

Aftercare and Maintenance

Bat and bird boxes shall be retained and maintained for the lifetime of the development. Deadwood habitat piles shall be retained in situ and replenished with suitable woody material as necessary. Enhancement features shall not be removed unless they are replaced with equivalent or superior features in an alternative suitable location.
