Dear Ms Grist,

Re: the above application.

[REDACTED]

My major worry is that it will create significant dust and noise combined with the prospect of the dumping of building waste at my boundary towards the end of the garden at 12A.

[REDACTED]

In recent years I have endured three significant extensions on either side of my property. In the course of these works there was very significant impact to me and other elderly neighbours - primarily as a result of noise, dust, and building materials being left on site.

On each occasion the planning authorities, householders and builders gave assurances on these issues together with important Health and Safety considerations.

Whilst initially these were met, over time this was not the case. The Planning Department were nowhere to be seen, there were unsafe scaffolds, workers without hard hats and materials being left in dangerous locations. I also endured both work and deliveries out of working hours and without any prior notice.

The amount of dust from wood, bricks and other materials was such that not only did it significantly aggravate my asthma and distress my husband prior to his death from dementia but also necessitated extra cleaning of my car, drive and rear patio.

Given the above I am strongly of the view there is no realistic prospect anything will be different this time and therefore raise my concern and objection in the terms set out above.
