Abstract: This paper presents a new approach to the design of a fuzzy expert system for the diagnosis of faults in a power transformer. The proposed approach is based on the use of fuzzy logic to model the expert knowledge of the transformer fault diagnosis. The fuzzy expert system is designed to diagnose the faults in a power transformer by using the fuzzy logic inference engine. The fuzzy expert system is designed to diagnose the faults in a power transformer by using the fuzzy logic inference engine. The fuzzy expert system is designed to diagnose the faults in a power transformer by using the fuzzy logic inference engine.
