

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

- ☒ Yes
☐ No

4.2 If no, what earlier date did you agree with the LPA?

n/a

4.3 How have you met the guidance on ‘what counts towards your BNG’?

Find out what you can count towards a development’s BNG

Project ecologist has complied with Statutory Biodiversity Metric User Guidelines

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you’ve taken on site, including to avoid or minimise the impact on irreplaceable habitats.

No irreplaceable habitats present, minimal habitat present at baseline as majority of site comprises modified grassland, ruderal vegetation, and artificial unvegetated; unsealed surface.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

- ☒ Yes
☐ No

4.6 How will you achieve the target net gain percentage?

- ☒ On-site
☐ Off-site
☐ Both

4.7 Are any of your on-site enhancements considered ‘significant’?

Find out what counts as a significant on-site enhancement.

- ☒ Yes
☐ No

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you’ve secured the habitat.

An area of modified grassland will be enhanced to medium distinctiveness other neutral grassland in moderate condition measuring approximately 0.4ha in area. New lengths of species-rich native hedgerow, species-rich native hedgerow with trees and species-rich native hedgerow with trees – associated with a ditch will be created on-site, in addition to a new ditch.

4.9 How many off-site biodiversity units do you need to meet 10% net gain?

n/a

4.10 Explain why you’re using off-site biodiversity units

You do not need to answer this question if you’re:

- only planning to use on-site biodiversity units or statutory credits
- using off-site units for a small (‘minor’) development that is not already exempt from BNG
