Subject: RE: Tanyard Manor DM/25/0915

Dear Tracy

Thank you for your email and attached revised plans. I note that we have also now received separate planning and listed building consent applications for the wall, LPG tank and WTPP drainage which have been allocated to my colleague Catherine Cardin. She will consult me with respect to the impact of these works on the setting of the listed building.

I note the revisions and further information provided which I would anticipate will address the remaining concerns with respect to the works to the house itself, although I will go through everything in more detail next week to confirm. In order to progress to a decision, I will need the following from you please:

- Your agreement to an extension of time to allow me to fully review the revised information, write up my report and have this signed off by a senior officer. Can I have by return email please your agreement to an extension until Friday 1st August- if possible, I will try to have decision to you before that date.
- Your agreement to an amended description of development to the following:
'Internal alterations to include structural alterations to kitchen, new doors and rooflights, new partitions and alterations to the layout at ground and second floors, and external landscaping.'

I will be in touch again next week to confirm that the revised drawings are fully acceptable and to seek your agreement to any necessary pre-commencement conditions.

I look forward to hearing from you,

Kind regards,

Emily Wade

Please note that this advice is given at Officer level only and is without prejudice to the formal decision of the District Council.

Submit your planning application online.

Subject: Re: Tanyard Manor DM/25/0915

Dera Emily,

Thank you for your reply.

I respond as follows:

1. To avoid delaying the urgent works to the house under this LBC application to allow the applicants to commence, we confirm we wish to omit the proposals to install the new WTPP and drainage, LPG tank and replacement retaining wall to the upper lawn. We attach amended drawings omitting these items and will submit them separately as a planning application. Please could you confirm these require a joint planning and LBC application? The paving the lawn area has also been removed. **Amended drawing no.s 27900_PL11E and PL006E**
2. Please see a sectional detail to supplement the floor plan to illustrate the new floor joists to the former sauna. Their exact profile and location will be informed accurately by the extant joists and mortices as detailed in the notes. The partition has been omitted. **Amended drawing no. 27900_PL12D**
3. We have added a sectional detail for the raised floor deck to the new bathroom to the 2nd floor. **Amended drawing no. 27900_PL13C**

We trust we have responder to your concerns and a decision can be issue as soon as possible.

Once you have confirmed the requirement for both planning and LBC as per point. 1 we will submit the application for the LPG tanks, retaining wall and WTP ASAP as these works of repair and upgrading are urgent.

Kind regards,

Tracy

Subject: Tanyard Manor DM/25/0915

Dear Tracy

Thank you for your various emails with respect to the above listed building consent application.

To consider these in turn:

19/06/2025

- The further information in respect of the basement is acceptable and I think sufficient to avoid a condition,
- Thank you for the plans w.r.t. the LPG tank and water treatment plant. As per my previous email, these works, as well as the alterations to the retaining wall around the house, require the benefit of planning permission. We do not appear to have received an application for you- can you confirm please when this will be made? Having consulted with my Line Manager, she advises that the two applications (planning permission and listed building consent) should be considered in parallel, which will mean that an extension of time will be required for the listed building consent application to match the target date of the planning application, once this established. We will know this only once the planning application is received and validated. My Line Manager further advises that the Environmental Protection and Contaminated Land Officer will need to be consulted with respect to the tank and water treatment plant- this can also be done once the planning application is received and validated. It may be that a decision can be made regarding both applications prior to the revised target date, but this would be subject to the necessary consultation period, and to the outcome of these consultations and other amendments discussed elsewhere in this email.
- The reinstatement works following the removal of the sauna are considered appropriate- we will require detailed drawings to show these on plan and in section, as part of the listed building consent application. These drawings should be as existing and as

proposed, and should indicate the nature of the ceiling structure as existing, and the reinstated joists and ceiling finish in the context of the original, retained fabric. Good to note that the wall framing at least remains intact.

- Noted with respect to the attic floorboards. In that case, a floating floor will be acceptable subject to detail. We would require sectional drawings either as part of the application or by condition, which should show the new floor structure in the context of the existing, retained fabric.
- I'm sorry but I remain of the opinion that the area to the west of the house should be retained as grass/soft landscaping, given the extent of hard-surfacing around the house generally, for the reasons previously set out. The revised plan still shows an extensive terrace. I would recommend that the plans are amended to show this omitted and the lawn retained.
- As above, please can you confirm when the planning application will be received?

30/06/2025

- The submitted Heritage Statement suggests that the first floor bathroom concerned is part of the 17th century range of the building. The fabric and plan form of this part of the house will therefore be of a high level of interest. Although the Statement does not go into great detail regarding the evolution of the plan form of the Manor, it would appear that this room may be in its original proportions. From what I can see from the photographs available (admittedly not taken for this purpose) there does not appear to be evidence that a partition was previously in place beneath the beam running north south across the centre of the room. As such, in my opinion, unless further evidence can be provided to contradict this assessment (such as a more detailed historic building survey showing that a partition was historically present in this location), to subdivide the room in this manner will detract from the historic plan form and flow of the building. I would therefore suggest that this amendment is not made to the scheme.

I hope this is helpful and I look forward to hearing from you with respect to the planning application and suggested amendments.

Kind regards,

Emily Wade
