MID SUSSEX DISTRICT COUNCIL

DM/25/0328

**45 Franklynn Road, Haywards Heath, West Sussex, RH16 4DQ, , ,
Proposed two storey side extension and single storey garage conversion
Mr Noufal Palliprath**

SUMMARY OF REPRESENTATIONS

No representations have been received in response to this application.

SUMMARY OF CONSULTEES

Southern Water

Southern Water has determined the Flow rate for the above site will remain the same/similar as capacity is not an issue and no southern water assets will be affected. Therefore, Southern water has no objections to this proposal.

Surface water should not involve disposal to a public foul sewer and should be in line with the Hierarchy of H3 of Building Regulations.

Any new connections to the public sewerage system will require a New Sewer Connection application (we sometimes refer to this as a Section 106) to be submitted and approved by Southern Water.

Due to changes in legislation that came in to force on 01 October 2011 regarding the future ownership of sewers it is possible that some previously owned private sewers now deemed to be public could also be crossing the above property which are not shown on the Southern Water records. Therefore, should any other sewer be found during construction works, an investigation of the sewer will be required to ascertain its condition, the number of properties served, and the potential means of access before any further works commence on site.

TOWN COUNCIL OBSERVATIONS

No comment.

INTRODUCTION

Planning permission is sought for a two storey side extension and single storey garage conversion.

RELEVANT PLANNING HISTORY

There is no relevant planning history.

SITE AND SURROUNDINGS

45 Franklynn Road is a south west facing, detached, two storey dwelling that is situated on a corner plot. It is a period dwelling that is constructed of brick, with a pan tile roof and sash windows. The dwelling is characterised by a recessed entrance a bay window to the front. It benefits from a two storey off shot and an attached garage to the rear.

The site is located within the built up area of Haywards Heath. Neighbouring houses are situated to the west, whilst a commercial premises is to the north. Franklynn Road, a classified road, is to the south of the application site and Eastern Road is to the east. The dwelling is set back from the highway by a garden.

APPLICATION DETAILS

Planning permission is firstly sought to construct a two storey side extension. At the ground floor level this would contain a toilet, whilst an additional toilet and en-suite are proposed on the first floor. The extension is to be some 4.5 metres deep and 1.7 metres wide. A pitched roof design is proposed that would continue the existing eaves line and have a ridge height of approximately 7.2 metres.

Permission is also sought to convert the existing garage into an office with a toilet. Externally the only changes would be the replacement of the garage door with a window and door as well as the installation of a rooflight.

The extensions are to be finished in materials to match the host dwelling.

LEGAL FRAMEWORK AND LIST OF POLICIES

Planning legislation holds that the determination of a planning application shall be made in accordance with the Development Plan unless material considerations indicate otherwise.

Using this as the starting point the development plan for this part of Mid Sussex consists of the District Plan, Haywards Heath Neighbourhood Plan and Site Allocations Development Plan Document.

National policy (which is contained in the National Planning Policy Framework and National Planning Policy Guidance) does not form part of the development plan but is an important material consideration.

Mid Sussex District Plan

The District Plan was adopted at Full Council on 28th March 2018.

Relevant policies:

DP26 - Character and Design

Site Allocations Development Plan Document

The Site Allocations DPD was adopted on 29th June 2022. It allocates sufficient housing and employment land to meet identified needs to 2031.

There are no relevant policies.

Haywards Heath Neighbourhood Plan

The Haywards Heath Neighbourhood Plan was formally made on 15th December 2016.

Relevant policies:

Policy E9 - Design

Policy H9 - Building Extensions

Other Material Considerations

Mid Sussex District Plan 2021-2039 Consultation Draft

The District Council is reviewing and updating the District Plan. Upon adoption, the new District Plan 2021 - 2039 will replace the current District Plan 2014-2031 and its policies will have full weight. In accordance with the NPPF, Local Planning Authorities may give weight to relevant policies of the emerging plan according to the stage of preparation; the extent to which there are unresolved objections to the relevant policies; and the degree of consistency of the relevant policies in the emerging plan to the NPPF. The draft District Plan 2021-2039 (Regulation 19) is currently at Examination and the stage 1 hearings were concluded on the 31st October 2024. There are unresolved objections to some of the

Policies in the draft District Plan and as such, only minimal weight can be given to the Plan and this planning application has been assessed against the policies of the adopted District Plan.

Relevant policies:

DPS2 - Sustainable Design and Construction

DPS6 - Health and Wellbeing

DPB1 - Character and Design

Mid Sussex Design Guide Supplementary Planning Document (SPD)

The Council has adopted a 'Mid Sussex Design Guide' SPD that aims to help deliver high quality development across the district that responds appropriately to its context and is inclusive and sustainable. The Design Guide was adopted by Council on 4th November 2020 as an SPD for use in the consideration and determination of planning applications. The SPD is a material consideration in the determination of planning applications.

National Planning Policy Framework (NPPF) (December 2024)

ASSESSMENT

Policy DP26 of the Mid Sussex District Plan states:

'All development and surrounding spaces, including alterations and extensions to existing buildings and replacement dwellings, will be well designed and reflect the distinctive character of the towns and villages while being sensitive to the countryside. All applicants will be required to demonstrate that development:

- o is of high quality design and layout and includes appropriate landscaping and greenspace;*
- o contributes positively to, and clearly defines, public and private realms and should normally be designed with active building frontages facing streets and public open spaces to animate and provide natural surveillance;*
- o creates a sense of place while addressing the character and scale of the surrounding buildings and landscape;*
- o protects open spaces, trees and gardens that contribute to the character of the area;*
- o protects valued townscapes and the separate identity and character of towns and villages;*
- o does not cause significant harm to the amenities of existing nearby residents and future occupants of new dwellings, including taking account of the impact on privacy, outlook, daylight and sunlight, and noise, air and light pollution (see Policy DP27);*
- o creates a pedestrian-friendly layout that is safe, well connected, legible and accessible;*
- o incorporates well integrated parking that does not dominate the street environment, particularly where high density housing is proposed;*
- o positively addresses sustainability considerations in the layout and the building design;*
- o take the opportunity to encourage community interaction by creating layouts with a strong neighbourhood focus/centre; larger (300+ unit) schemes will also normally be expected to incorporate a mixed use element;*
- o optimises the potential of the site to accommodate development'.*

This ethos is echoed within Policy E9 from the Haywards Heath Neighbourhood Plan.

Policy H9 of the Haywards Heath Neighbourhood Plan states:

'Extensions to existing dwellings will be permitted where it meets the following criteria:

- o The scale, height and form fit unobtrusively with the existing building and the character of the street scene.*
- o Spacing between buildings would respect the character of the street scene.*
- o Gaps which provide views out to surrounding countryside are maintained.*
- o Materials are compatible with the materials of the existing building.*
- o The traditional boundary treatment of an area is retained and, where feasible reinforced.*

- o *The privacy, daylight, sunlight and outlook of adjoining residents are safeguarded'.*

In terms of the Mid Sussex Design Guide SPD, Principle DG49 establishes general principles for extensions and states:

'Extensions should respond to the design of the original dwelling and applicants will be expected to demonstrate how local character has informed the design proposal. Extensions should also normally be designed to be well-integrated with the existing scale, form and massing allowing the original building to remain the dominant element of the property whether it has one or several additions'.

Principle DG50 relates specifically to side extensions and states that:

'Side extensions should normally be subservient to the original dwelling and typically be set-back from the front of the house to help define the original building.

The gaps between dwellings can sometimes positively contribute to articulating (for example, through the consistent rhythm of repeated houses) and adding interest in a street frontage or by providing views / visible connections to the surrounding countryside. Side extensions will therefore need to appropriately respond to the character of the street form and will not normally be accepted where they close an important gap and view'.

The application property is a detached dwelling that is situated within a predominantly residential area, facing onto a classified road. Surrounding houses are generally of a traditional form and design, with a shared pallet of materials.

Planning permission is sought to construct a two storey side extension and to convert the existing garage. It is considered that proposed extension would be relatively modest in scale and would not appear overly dominant in relation to the host dwelling. The design of both the extension and garage conversion would reflect the character of the existing building and the use of materials to match would provide a consistent finish.

Due to the position of the application site, the development would be visible within the streetscene. Given the varied nature of the surrounding area and the appropriateness of the design in relation to the host dwelling, it is considered that the works would not have an harmful impact on the character of the surrounding area.

In terms of the impact to neighbouring dwellings the test, as set out under policy H9 of the Haywards Heath Neighbourhood Plan, is that the privacy, daylight, sunlight and outlook of adjoining residents are safeguarded. Under section 38(5) of the Planning and Compulsory Purchase Act 2004 if a policy contained in a development plan for an area conflicts with another policy in the development plan, the conflict must be resolved in favour of the policy which is contained in the last document to be adopted, approved or published. As such, policy DP26 of the MSDP is considered to take precedence and therefore the test in this instance is whether the development causes significant harm to neighbouring amenities as outlined above.

To the west of the application site is 43 Franklynn Road. Given the proposed extension is to be sited behind the existing off shot and that the garage conversion would not enlarge the existing building, it is considered that the development would not affect the light and outlook available to No. 43. A window was initially proposed, as part of the garage conversion, in the western elevation, which would have directly faced onto No. 43. Revised plans were therefore provided that removed this window and replaced it with a rooflight. As such it is considered that the proposal would not have an harmful impact with regards to overlooking.

Given the domestic nature of the proposed development it is considered that it would not have an harmful impact in terms of noise, air or light pollution.

Biodiversity Net Gain

Biodiversity net gain is required under a statutory framework introduced by Schedule 7A of the Town and Country Planning Act 1990. This is a householder application within the meaning of article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order 2015. As a householder application this development is exempt from the requirement to provide biodiversity net gain.

PLANNING BALANCE AND CONCLUSION

In conclusion, the proposal would accord with the requirements of policy DP26 of the Mid Sussex District Plan and policies E9 and H9 of the Haywards Heath Neighbourhood Plan. The proposal is therefore considered to be acceptable.

Decision: Permission
