ALEXANDER GEORGE MITCHELL

13/09/2019 – 27/03/2020 31.1.2020

My photographs from September 2019 to March 2020 are lacking, due to me breaking my phone in Spring 2020. This can be verified in my Instagram post, dated 1 July 2020, in Appendix 13.

28/09/2019

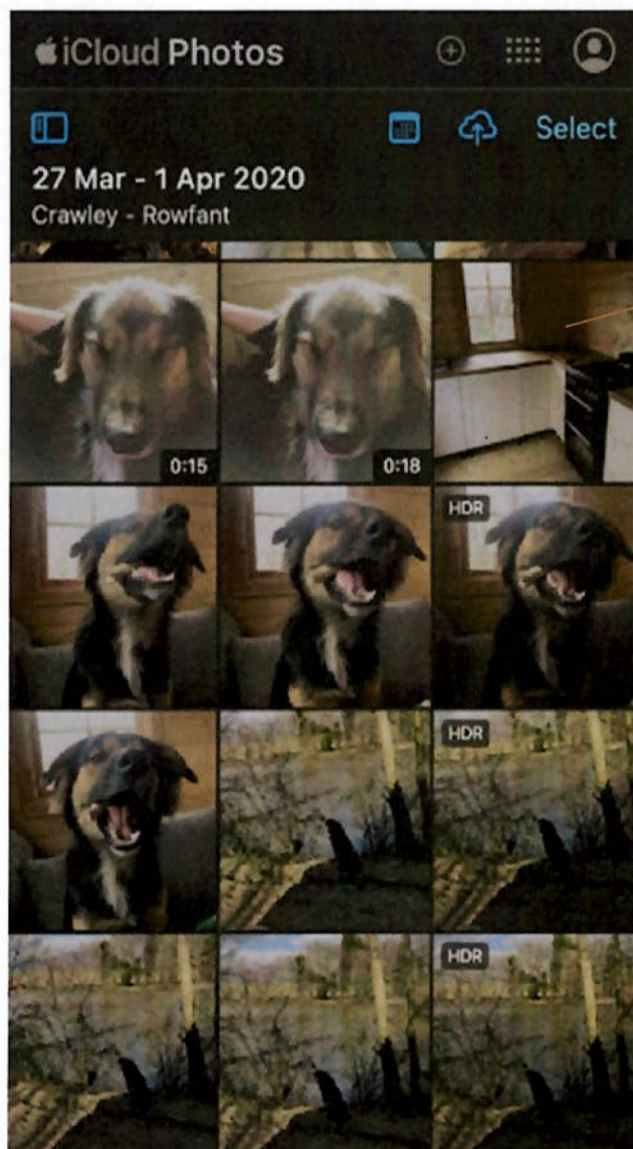

The doors went in and we moved in shortly after this date.

22/01/2020

The cabin in January 2020, with a plastic sheet over the roof to keep it water tight whilst living there.

21/12/2019

We had the materials to complete the roof but waited until Spring to do this due to the improved weather. I speak about living in the cabin over the winter of 2019 in my Instagram post, dated 12 July 2020, which can be found in Appendix 13.

29/03/2020

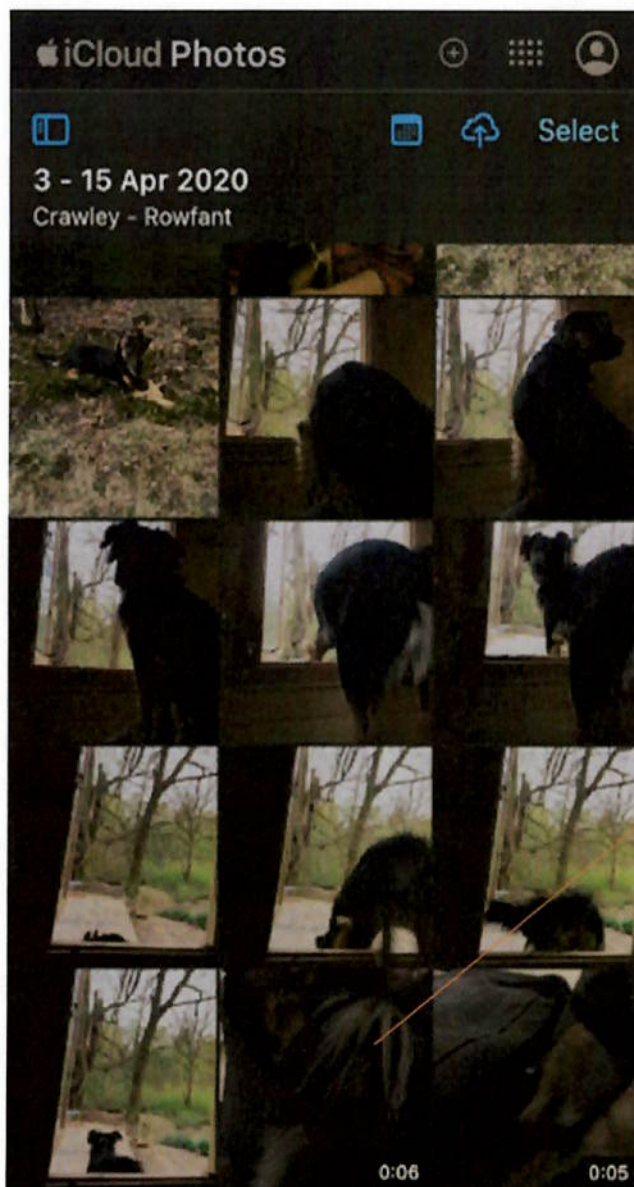

We worked on the cabin whilst living there and finished the kitchen on 29/03/2020.

There is no tap installed as the property is off grid and we had no intention of installing a tap. We used our Berkey water filter and homemade sand filter to filter rainwater. I go into more detail about this in my Instagram post, dated 5 July 2020, in Appendix 13.

We initially kept the Berkey filter by the front door, but moved this to a shelf in the kitchen in June 2020.

We also had a camping table and gas camping stove by the door which is where we did all of our cooking until the oven was installed.

11/04/2020

A screen print of a video clearly showing the cabin being used residentially, with the Berkey Water filter in the background (please see large annotated photo at the end of the document).

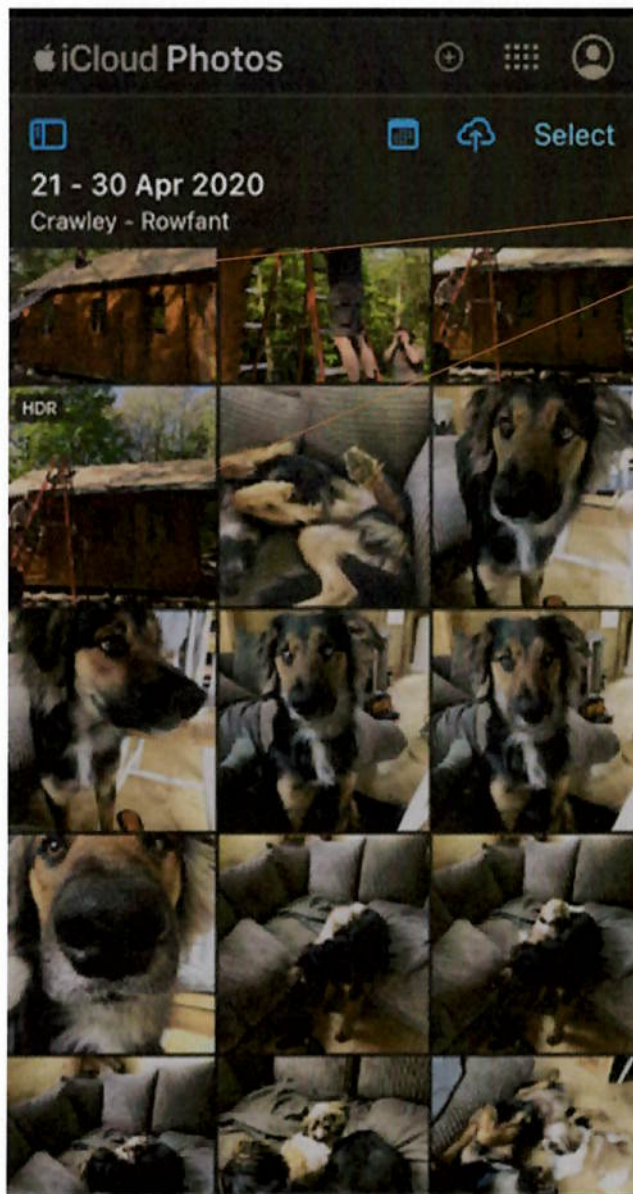

19/04/2020

This photo shows various paraphernalia of our daily lives in the cabin – used coffee cups, face wash, hay fever medication etc.

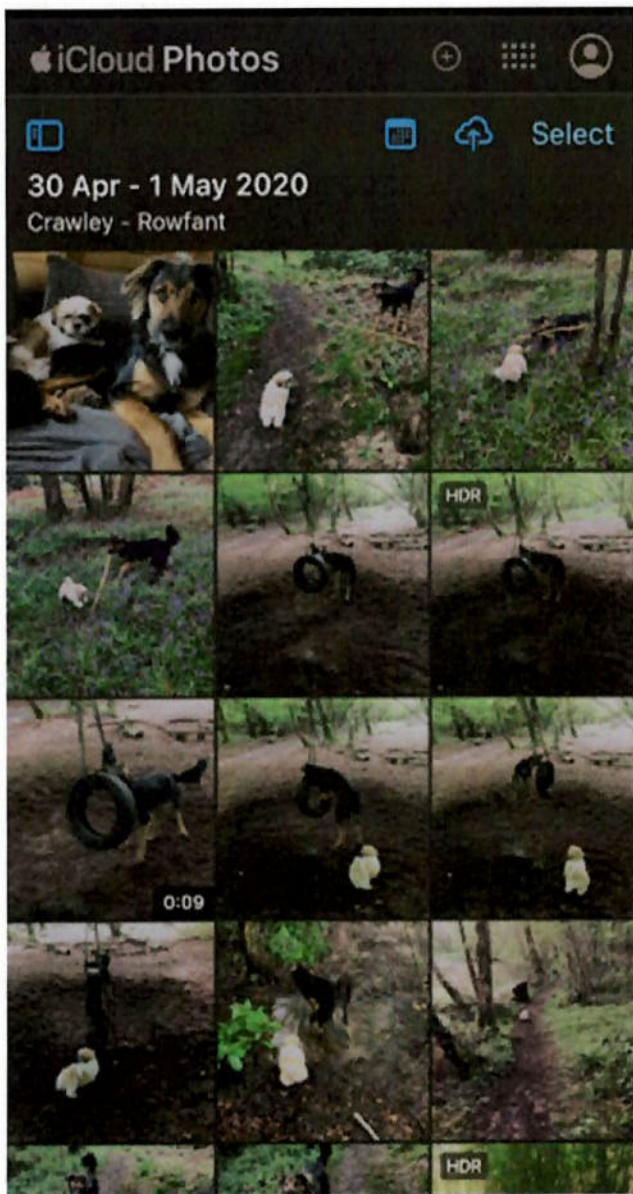

19/04/2020

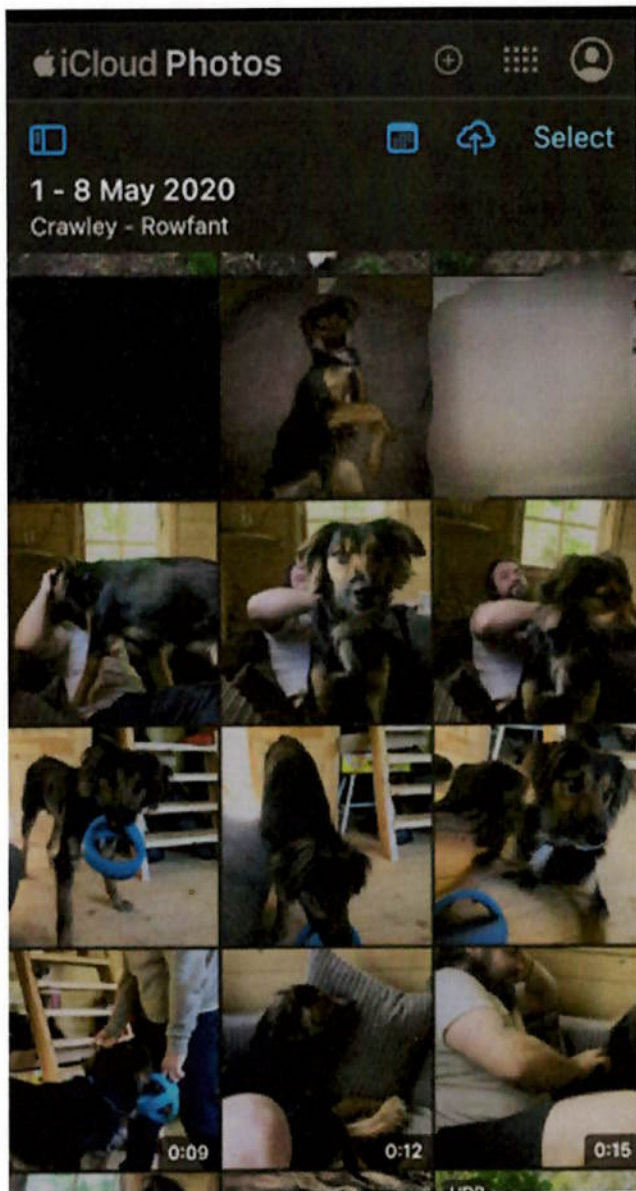

Our washing up is shown on the floor by the front door, which (as mentioned previously) is where our Berkey water filter was kept until June 2020 and where we did all of our washing up.

25/04/2020

Our roof light went in and we started to shingle the roof. We were still living here at this time.

08/05/2020

We completed the roof shingles.

17/05/2020

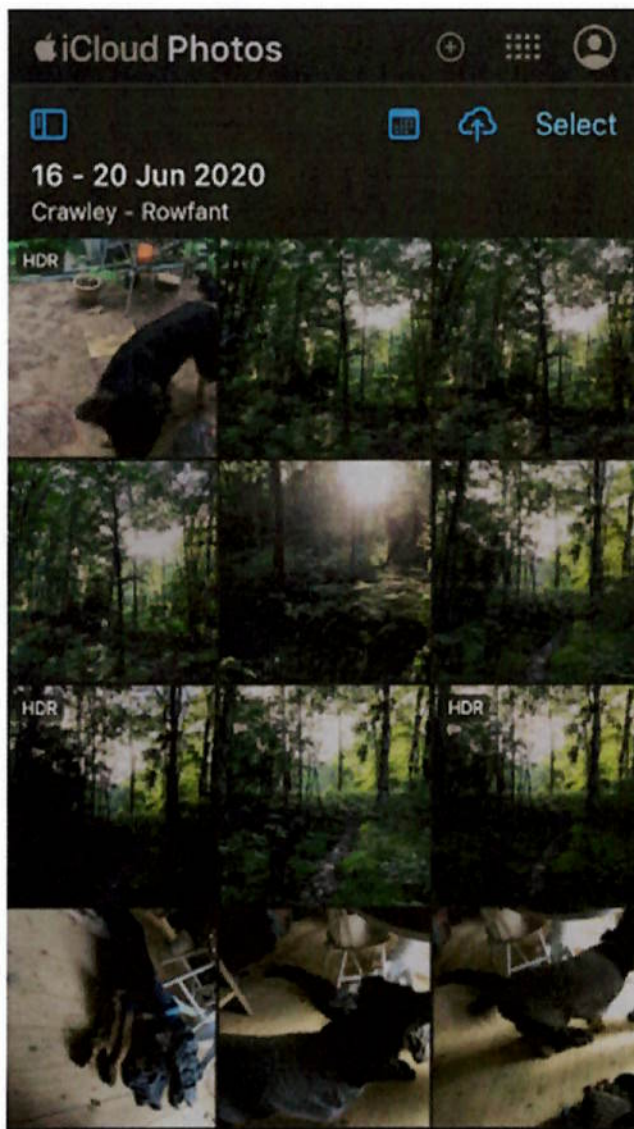

The background of this picture shows the Berkey water filter by the front door, along with the soap and washing up bowl.

08/06/2020

The Berkey water filter has been moved to the kitchen.

20/06/2020

A photo showing the cabin clearly being used residentially, with various paraphernalia of our day to day lives in the background.

02/07/2020

This shows us filtering the rainwater in our homemade sand filter. This water was then put through the Berkey to clean it for drinking.

05/07/2020

The charge controller for our solar power.

19/07/2020

A picture of the house being used residentially, after having tidied up outside.

22/07/2020

We built the shed to house the compost toilet. This was completed on this date although I did not take a photograph of the finished shed.

23/07/2020

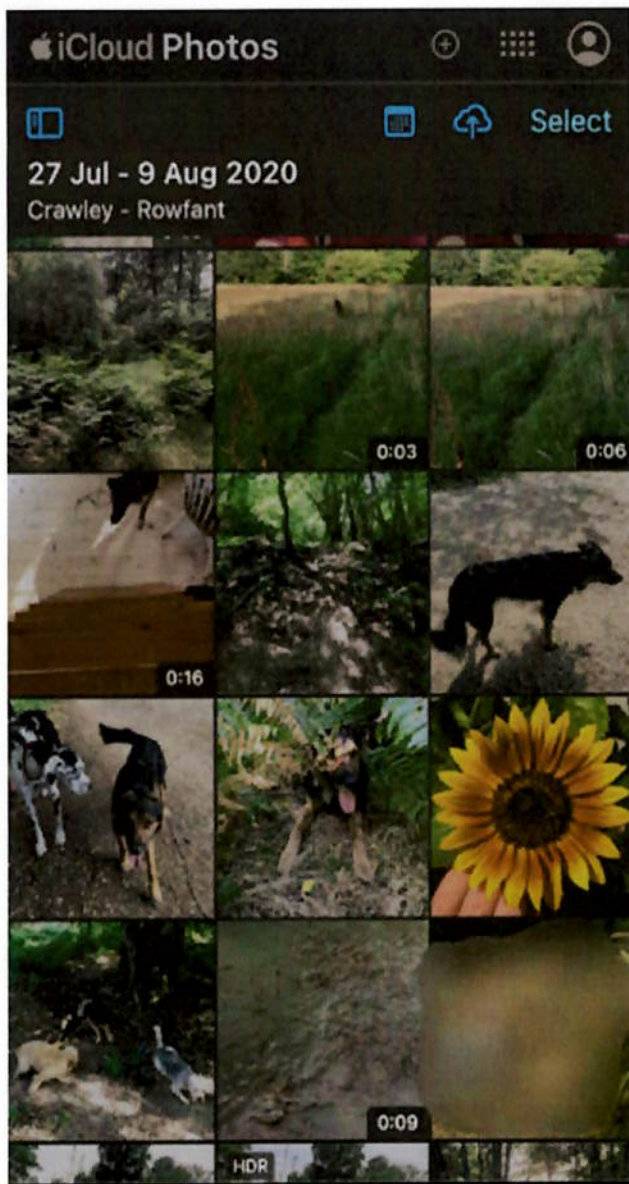

We built the compost toilet to go inside the shed. Before we had the compost toilet, we dug holes in the ground. This can be verified in my Instagram post, dated 26/07/2020, in Appendix 13 where I make reference to "hanging up the shovel".

As this went inside the shed, we would not have built it unless the shed was finished.

23/07/2020

The frame for the compost toilet.

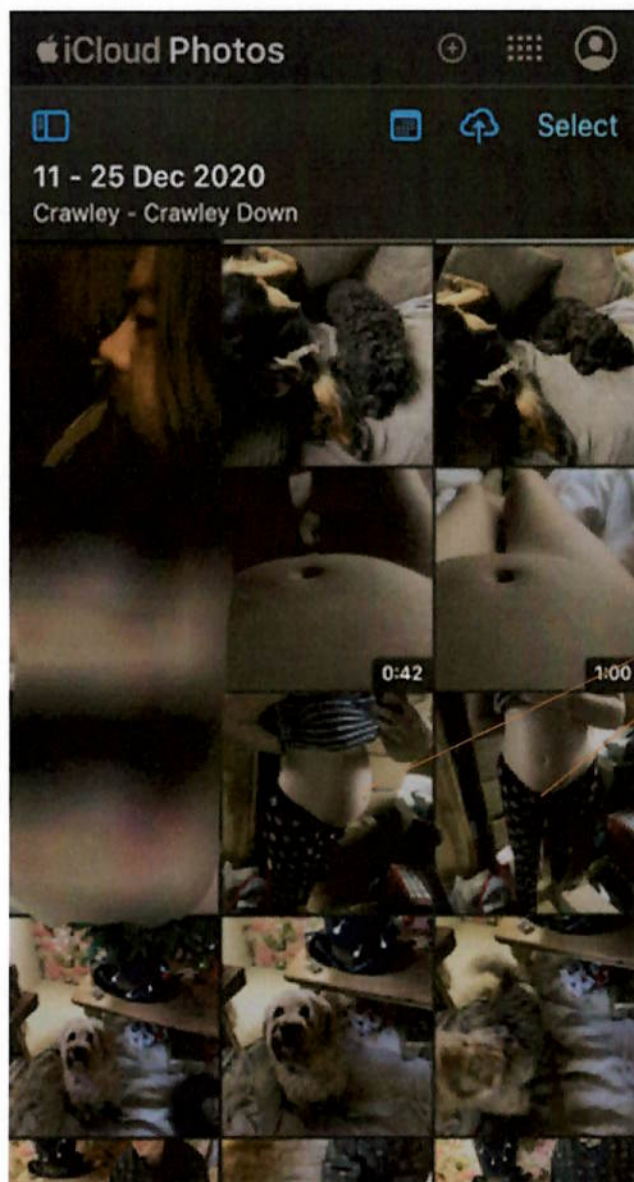

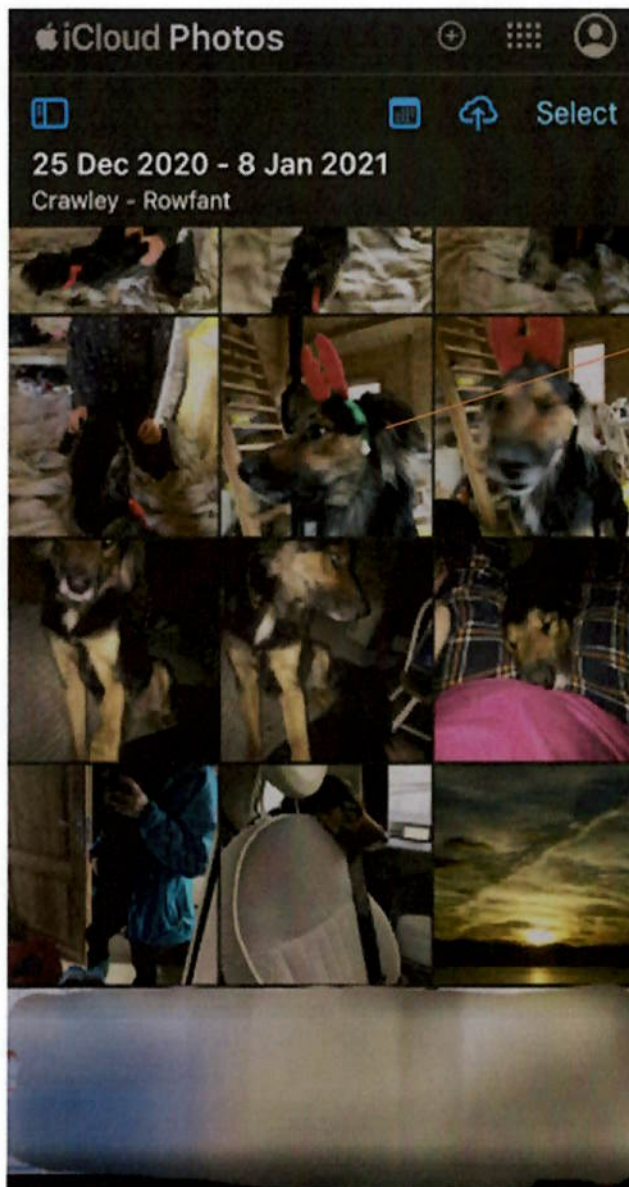

24/12/2020

Me documenting my pregnancy whilst living in the cabin, and preparing for Christmas (this is the bathroom).

26/12/2020

Boxing day in the cabin.

15/01/2021

Sleeping in the cabin whilst pregnant.

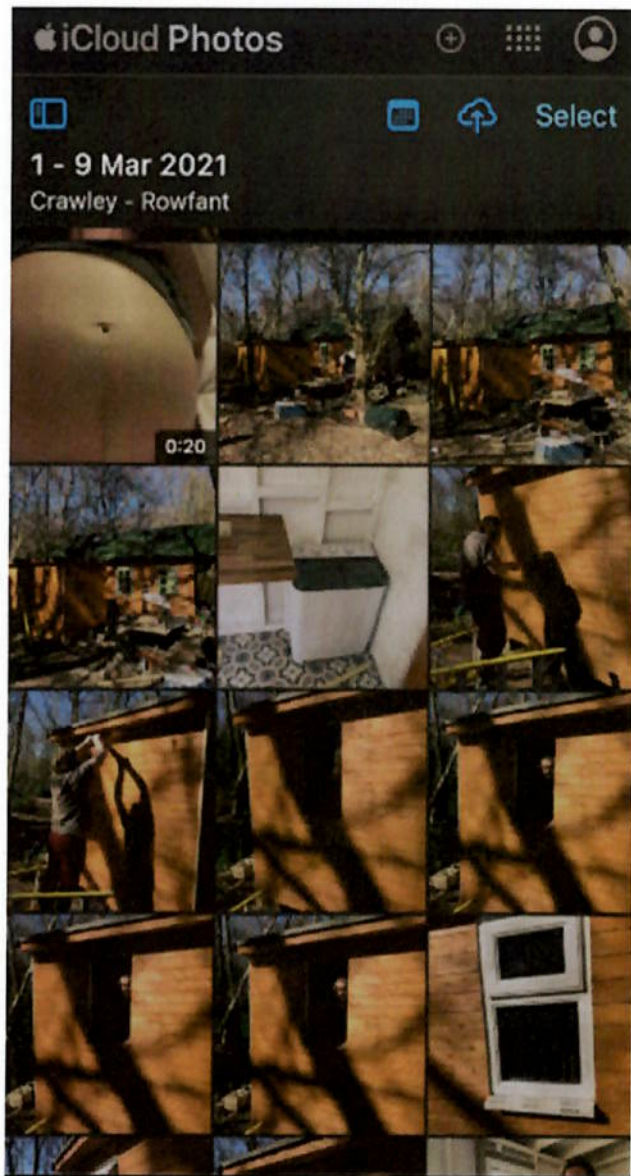

20/02/2021

The start of the "store room" addition. We decided to add this after I found out I was pregnant. We wanted a space to store more things, and a space where the dogs could go to get clean before entering the main house.

We continued to live in the cabin whilst this was being built.

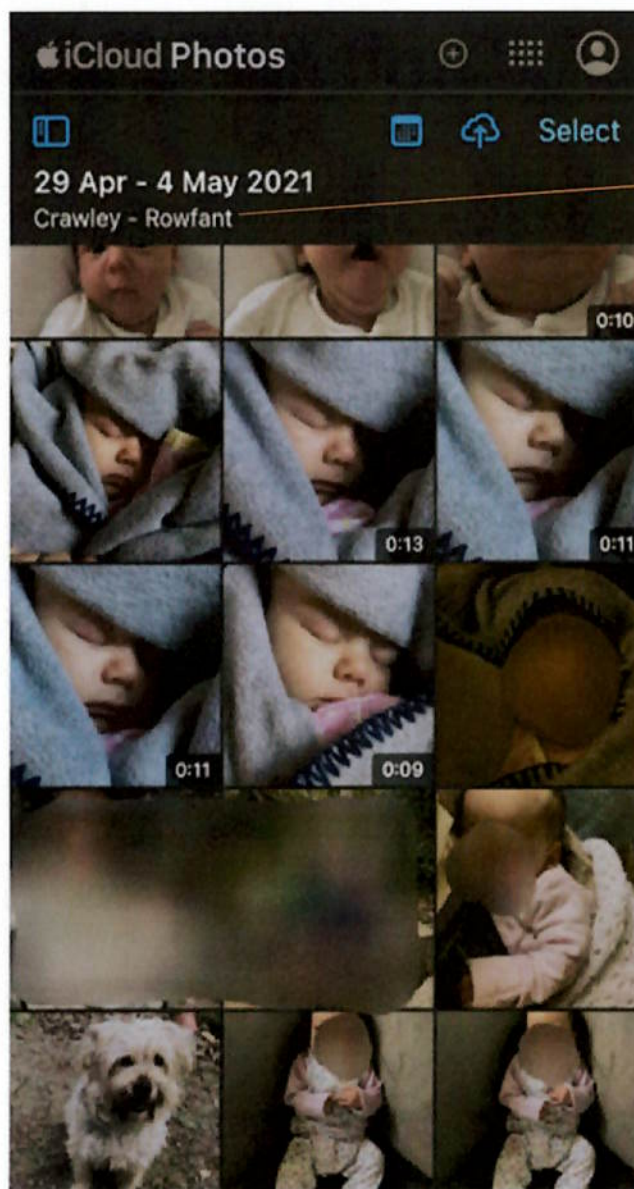

During this period I was in and out of hospital due to complications with my pregnancy.

22/03/2021

My partner was still living at the cabin when I was in hospital. Due to covid restrictions he was only able to visit me for one hour a day.

We got a new sofa on this date in preparation for the baby. This sofa appears in many future photos of our lives in the cabin.

My daughter was born on 23/03/2021 by caesarean section.

We took her home to the cabin on 29/04/2021 as highlighted in the location of these photos.

The bottom right photo shows the new sofa as mentioned previously.

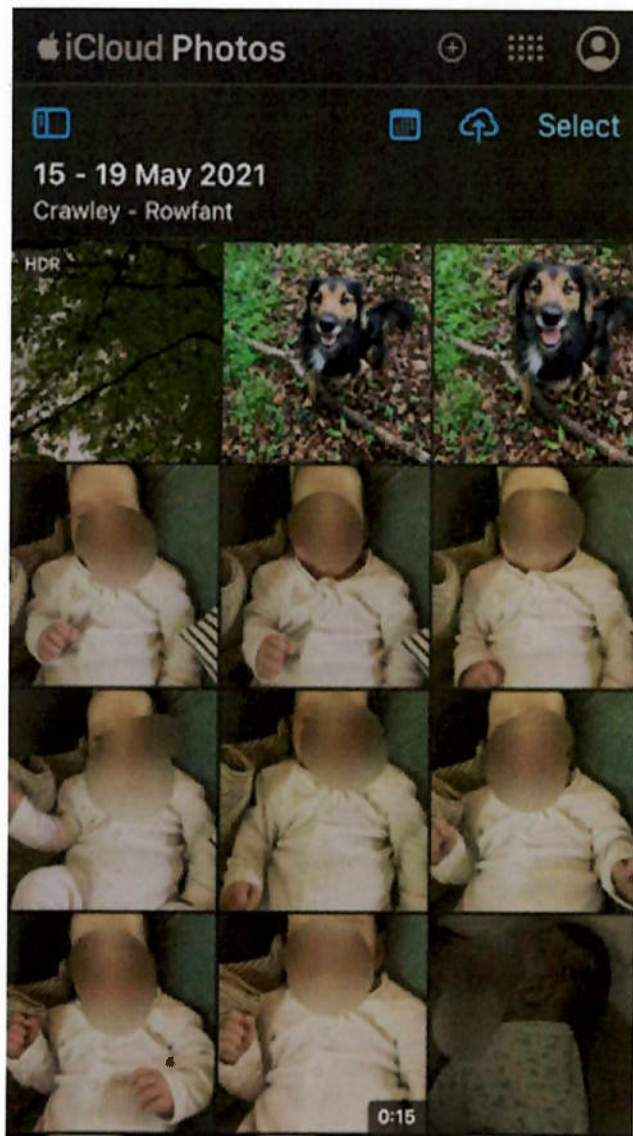

03/06/2021

This photo clearly shows us living in the cabin, with all of the paraphernalia of having a newborn.
