Dear Anna

I had a look at the tree officer's comments and I am a bit puzzled because the information is on the document.

- The existing fence is to be retained which protects the trees from the construction work. There is no space for another fence.
- The pink shading is the existing concrete surface that will be replaced with a permeable surface to the benefit of the trees.
- Excavations within the rpa are addressed with a method statement.
- The plan with the annotation shows the species of tree and the rpa.
- Drainage is itemised.
- As the report states there should be no damage to the trees, all of which are to be retained.

I am not sure we need to rush off and do anything else?

Best wishes

Judith
