

## APPENDIX A

## MASTERPLAN

LAND WEST OF GATESMEAD PLANNING LAYOUT

**Key**

- Site Boundary
- Ownership Boundary
- Adoptable Highway (see Engineers details)
- Adoptable Footpath (see Engineers details)
- Shared Surface
- Private Drive
- Trim Trail/POS Footpath
- Private Path
- Grasscrete
- Public Open Space (Inc. Mown Paths)
- Existing Trees/Planting (see Landscape Arch. details)
- Proposed Trees/Planting (see Landscape Arch. details)
- Attenuation pond (see Engineers details)
- Boardwalk
- Gas Pipeline - 6 & 12m Easement
- Rear gate
- Affordable Housing - Rented
- Affordable Housing - Shared Ownership
- BCP Bin Collection Point

|                                                                                                                |                                                                                                                                    |                                            |       |                 |

| <b>RECOMMENDATION:</b>  | Advice                                                                                                                            |

The Local Highways Authority (LHA) has been consulted for pre-application advice for proposed development at Land at Old Wickham Lane. A virtual meeting was held on 3<sup>rd</sup> October 2025 to discuss the highway safety and capacity elements of the scheme. Discussions from the meeting and the Transport Scoping Note have been used to inform the following comments. Comments have been made against paragraph numbers in the scoping note, where possible. Additionally, the applicant has put forward two options for access into the site via an additional Technical Note – mounded earthworks to allow no dig root protection zones or supported bridge deck over the root protection zones and requested highways perspective on which we would adopt as publicly maintained highway and requested comment on proposals where PROW HAH/47bCU/1 crosses/joins this.

### **Relevant Policy**

2.1.2 – the Transport Statement should also consider; LTN1/20 in terms of Cycle Infrastructure Design and Manual for Streets in terms of access, visibility, internal layout principles etcetera.

### **Accessibility (3)**

3.3 - Pedestrian access via links to Public Right of Way (PROW); HAH/46aCU/1, HAH/46bCU/1 (Old Wickham Lane) to the south and HAH/47bCU/1 to the east (referred to incorrectly as LIR/24/LR/2). 2m wide footway on Gatesmead for majority of its length with dropped kerb/tactile paved crossings in some key locations although there is not a continuous route from Gatesmead to Birchen Lane. Applicant should outline improvements on the pedestrian desire line, for example;

- Highlight where Gatesmead itself may benefit from dropped kerb/tactile paved crossings before reaching Birchen Lane.
- Tactile paving at existing dropped kerb crossing of Gatesmead junction with Birchen Lane.
- Dropped kerb/tactile paved crossing of Birchen Lane/Portsmouth Lane junction.
- Dropped kerb/tactile paved crossing of Portsmouth Lane in vicinity of mini roundabout.
- Dropped kerb/tactile paved crossing of Sunte Avenue to link to westbound bus stop.

Such improvements would allow continuous pedestrian routes along desire lines that is safe and suitable for all, to reach the bus stops on Sunte Avenue (12-minute walk).

Alternatively, pedestrians could travel from south end of site to the wider area using either PROW HAH/46aCU/1 (Old Wickham Lane – westwards), HAH/46bCU/1 (Old Wickham Lane – eastwards), HAH/47aCU/1 (Wickham Way - southwards). Wickham Way provides a link south to College Road and nearest bus stops. Haywards Heath Train station is approx. 0.6 mile/5 min cycle from within site (using Wickham Way link). Pedestrian improvements to reach westbound College Road bus stop and provide continuous link to train station could include;

- Tactile paving to existing dropped kerb of Wickham Way/College Road junction.
- Dropped kerb/tactile paved crossing of College Road to link to Mill Green Road/ College Road westbound bus stop

The scoping note states Sunde Avenue and College Road bus stops are similar walking distance thus improvements on the pedestrian routes toward both these should ideally be explored. With regards to Realtime (RTPI) at these stops, comments have been received from the ITS Manager:

*On College Road, the westbound bus stops (called College Road and Summerhill Close) are only served by a few journeys before 07:30. The two eastbound bus stops were assessed a few years ago as part of a BSIP funded RTPI project and it was decided not to progress with displays.*

*The eastbound bus stop on Sunde Avenue already has a display and the westbound stop is only served by a few journeys before 07:30.*

Table 3.1 – it is accepted that there are a number of local amenities/retail/services within acceptable walking and cycling distance.

3.3.3 – National Cycle Route 6 on Balcombe Road east of site but not clear if this on/off road route – more detail would be required on how site will link into nearby cycle routes, what these cycle routes comprise, as well as proposals for within the site and linking to PROW network.

Gatesmead is 30mph and includes traffic calming (build out) 230m east of proposed site access – roads surrounding area are 30mph which is conducive to cycling on carriageway.

3.6 - Collision data area shows some incidents recorded along Portsmouth Lane and junction with Sunte Avenue but inspection of incident data does not reveal pattern related to safety concern of road layout/geometry.

#### **Proposed Site Access Strategy (4.2)**

Vehicle access is proposed via Gatesmead (continuation of the existing cul-de-sac into the site). Gatesmead is currently under agreement (PSI/3346) but is not yet adopted public highway. There are remedials to be completed but it is planned for s38 adoption up to plot 19 (no.56). Once adopted there would be a section of carriageway between plot 19 (no.56) and the site that remains privately maintained.

Traffic calming is proposed where the road is currently not planned for adoption and it is presumed that after modifications it would be offered for adoption along with the site access road.

The applicant has also queried acceptability of traffic calming for adoption – this would be something reviewed as part of the Road Safety Audit (RSA) and future RSAs and technical approval though it is understood the existing Gatesmead extension features such traffic calming and is planned for adoption and thus sets an acceptable precedent, in principle.

4.2.1 - traffic calming feature is proposed at the site entrance to manage vehicle speeds and enhance safety: swept path tracking and suitable forward visibility demonstrated.

Stage 1 Road Safety Audit (RSA) would be required. RSA should also cover any proposed pedestrian infrastructure improvements (potential uncontrolled crossings) as these would be designed and provided by developer via s278 agreement. Forward visibility has been demonstrated in line with 20mph design speed (25m stopping sight distance).

#### **Technical Note (Footpath Impact Review)**

Option 1 (groundworks) would require the road to be built up on top of existing ground and require the PROW to rise to carriageway level then back down. The PROW connection to north would require a steeper slope and it is noted this PROW is a leisure route, not designed for mobility impaired. Option 2 proposes suspending road above existing ground, the PROW will require rising to carriageway level and back down with ramps provided from the bridge deck and potential steps on north side.

The **WSSC Structural Engineer** comments on these options as follows:

1. The options outlined in the report for the PROW route are reasonably sensible, but a decision regarding the composition of the road carrying feature over the RPZ is required before solutions for the PROW route over can be agreed.
2. Option 1 for the mounded earth solution is far more practicable and less challenging than connecting a ramp to a bridge (Option 2). Both are achievable, but road carrying solution should be agreed before selecting the preferred Option 1.
3. Regardless of the PROW route being an earth worked solution or a structural solution, it is recognised that the site is geometrically constrained and therefore a steeper than desirable ramp will be required, and or/steps. I would suggest both if possible.
4. It is accepted that raising the adjacent footbridge just to achieve a more desirable gradient is perhaps an overly onerous requirement, albeit the cost of doing so is considered very small in the context of the other adoptable infrastructure works.
5. Gradients of 1:12 are considered acceptable for ramps to footbridges, and so also ok for non-structural ramps, but such gradients must be over limited distances and rest landings must be supplied at suitable intervals. Noting that providing any landings will lengthen the overall ramp, providing landings may prove to be impossible without further detrimental effects of either a even steeper route or increased length (which then clashes with the adjacent footbridge). Compromise of the length and / or gradient will be required and would tentatively be accepted given the environment and site constraints.
6. It is recognised that wherever 'reasonably practicable' PROW routes should made suitable for disabled users, so to completely dismiss disabled user compliance at the locale being reconstructed just because of a non-compliant section up / downstream, that might feasibly be upgraded at some point in the future, would perhaps be a bit remiss.

Summary: A fully compliant route is accepted as being not reasonably practicable to achieve so compromises on some technical requirements can be given. A maximum gradient of 1:12 is broadly considered acceptable but the detailed design of the ramps, connectivity with the road carrying feature, and connectivity of the adjacent PROW features should be subject to further scrutiny and approvals, least of all due to the uncertainty of the composition of the road carrying feature that could significantly impact on what is / is not viable for the PROW approach ramps.

**WSSC PROW** team comments on proposals and connections to PROW network:

The PROW are incorrectly described (para 3.3.2 of the Transport Scoping Report) and should be as shown below.

The Footpaths affected are FP46aCU, FP46bCu (both along the southern border and forming part of the Sussex Diamond Way) and FP47bCU along the eastern border. All are footpaths and not bridleways as the latter is wrongly described within Appendix A Access Proposals.

The safety of PRoW users is my main concern, where the main access road crosses FP47bCU. I understand there will be a traffic calming feature and a 20mph speed limit. There should be signage warning vehicles of pedestrians crossing.

Access to the proposed development from the (current) cul de sac (Gatesmead) would involve the road crossing PROW Footpath 47bCU and the Review suggests designs to achieve this.

A 1:12 ramp on the north side is acceptable and Option 1 is our preferred option details of the crossing will be addressed on receipt of the full planning application.

It is understood that a contribution will be sought to improvements to the PRoWs. It would be helpful to know what type of improvements (surfacing, low level lighting, etc.) might be made, as we are seeking to understand the quality of the PRoW the future to determine the most attractive routes to/from the site to bus stops.

WSCC has recently completed re-surfacing works on Footpath 47bCU and the extension to the north that, Footpath 27LR.

A contribution will be sought to improve the surface of Footpath 46cCU, approx. 500m, to a similar standard. This will be sought as the proposed development would undoubtedly result in a significant increase in footfall on a route that will link residential areas to the east and west of the railway line without the need to walk on the road.

### **Internal Layout (4.3)**

Comments on emerging masterplan (fig 4.1):

Would be a benefit to providing hardbound shared use path through the open space areas (e.g. yellow lines below) where this is currently open green space – providing improved pedestrian/cyclist interconnectivity.

Looped estate road – swept path tracking would be expected to show all anticipated vehicles can manoeuvre into and within the site.

Fig. 4.3 shows several internal links to the PROW bordering east and south of site (from 3 x location to east and 1 x location to south (linking opposite PROW HAH/47Acu/1). Such links into the PROW should be of suitable width and surface material to allow safe and suitable access for all. PROW team may have a view in terms of potential upgrade to bridleway.

Car and bicycle parking to be provided in accordance with WSCC Guidance on Parking at New Developments. We would also advise a suitable level of visitor and accessible parking bays (additional hatching/access aisle width).

### **Traffic Impact (5)**

Table 5.2 - Vehicular trip generation of 27 x movements in AM and 24 in PM peak hours (business as usual) and 28 x movements in AM and 17 in PM under a decide and provide approach. It is understood that decide and provide trip rates have been derived from projection of historical trip rate trends.

5.2.3 - Greater London should be removed as the region is not considered representative in terms of vehicle and active travel trip rates.

5.3.3 - The scoping note states junctions will be modelled 2025 baseline and 2027 future baseline – LHA request that 2030 is modelled as the future year instead of 2027. Gatesmead, Birchen Lane, Portsmouth Lane junctions will be modelled. It is likely that junctions further afield would not see more than 30 movements in any one hour and thus not require capacity modelling, though trip distribution/generation figures will determine this.

### **Travel Plan Statement (TPS) (6)**

The TPS and associated monitoring fee £1695 would be secured by s106 agreement at planning stage. TPS should also include:

For residential sites:

We would expect to see some sort of travel voucher offering to the initial occupants of the residential units. Vouchers should be worth at least £150 per dwelling and could be exchanged for one of the following:

- a. a season ticket for the local bus service
- b. a rail season ticket or network card
- c. a contribution towards the purchase of a new bicycle and/or equipment
- d. Bikeability training up to 4 members of the household (further details and course costs are available at

e. 12 months free membership to any local Car Club (including joining fee)

The Highway Authority would require the following documents to be submitted as part of any future application:

- A site location plan scale (1:1250) with site boundary indicated
- Schedule of existing uses including planning history with reference numbers
- Description, including site layout plans, of the proposed development and schedule of uses
- Summary of reasons supporting the site access/highways works proposals, including plan (scale 1:250 or similar) with achievable visibility splays indicated
- Final Stage 1 Road Safety Audit (RSA) of the site access and any proposed highway works, **with the Road Safety Audit Response Report (RSARR) in word format for the LHA to edit as Overseeing Organisation**, including any amended plans.
- A Transport Statement and Travel Plan Statement, including location plan of key services, availability of sustainable modes of transport and existing/future vehicular generation
- Reference to supporting national, regional, and local planning documents and policies
- Parking strategy, including provision of parking for all modes of transport
- Proposed trip rates supported with TRICS outputs and site selection methodology
- Junction capacity assessment in accordance with the WSCC Transport Assessment Methodology

I trust you appreciate that any advice given by council officers for pre-application enquiries does not constitute a formal response or decision of the council with regard to the granting of planning permission in the future. Any views or opinions expressed are given in good faith, and to the best of ability, without prejudice to the formal consideration of any application, which will be the subject of public consultation and ultimately decided by the Local Planning Authority.
