Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	Dear Katherine, I am writing to formally object to the proposed dormer windows facing the front of the property. As a resident of the area, I have concerns regarding the potential impact of this development and my main objections are as follows: 1. Impact on the Character of the Street - The proposed new dormer windows are not keeping with the character and architecture of the street or the nearby area. There is no house in the area that I've seen having a dormer window at the roof level / second floor. This would have a detrimental impact on the character and the visual appeal of the area. It may also set a precedent for further changes that could negatively affect the neighbourhood. 2. Impact on privacy - In addition to the visual impact, I am particularly concerned about the reduction in privacy that these dormer windows would create for the properties across the

road. As the windows would overlook neighbouring homes, this raises the risk of increased visibility into private spaces which would be an invasion of privacy for residents who enjoy the seclusion of their properties. I urge you to consider alternative solution e.g. skylight windows that would not compromise the privacy.

I kindly request that my objection be taken into consideration, and that the council thoroughly assesses the impact of this proposal before making a decision.

I would appreciate a written response confirming receipt of my objection and informing me of any further steps in the review process.

Thank you for your time and attention to this matter.

Yours sincerely,

A black rectangular box redacting the signature of the sender.
