[REDACTED]

I refer to the above planning application.

There needs to be a public consultation so that residents of Bolney can question the proposals and/or suggest alternatives.

The road on the development needs to be rerouted to provide a buffer zone along the east side of the site.

The proposed community hub is unnecessary and will only result in more traffic in the development. The village already has a substantial modern village hall. If there must be a community hub in the development, then it should be sited near the A272 in order to reduce the amount of traffic coming through the site.
