Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I am writing in objection to the proposed development on Land West Of Gatesmead Wickham Way Haywards Heath West Sussex. Wickham Fields is not 'just a field' it is an important resource to access nature for local people, a key place to safely let dogs off the lead, a place for older children and teenagers to play without the risk of traffic and an important natural environment for many species and a large number of mature and very beautiful trees.

I have been using Wickham Fields for recreation purposes since 2012 and, in particular, from 2016 onwards when I moved into my present address in Sunte Close. I have used the fields on a frequent basis to walk my dogs. The fields were also the last place my father-in-law was fit enough to walk to before his death. The walk over the fields, up to the golf course and back, is a long established and frequently taken walk.

I understand that there is a Definitive Map Modification Order application regarding the main footpaths over this site which is currently marked as undetermined. As stated above, I, and many others, have used these path for at least 46 years. No planning application should be decided before the status of this well-established path of community use is still undetermined.

These 11 acres of open grassland are vital for local wildlife. I myself have observed Red Kites, Buzzards and have heard woodpeckers. In the summer the fields are full of a wide range of flowering grasses and other plants and this sustains an array of insect life. Insect life is the foundation stone of biodiversity. This range of wildlife is hemmed in by the environmentally controlled lawns of Haywards Heath Golf Course. No development should even be considered without a full, independent survey.

The next nearest similar space is at Bluntswood. Many of the people I meet in Wickham Fields will not be able to travel there without the use of a car. The Bluntswood carpark is already full at many times of the day.

As far as dog walking is concerned there is Clair Park, but I, for one, cannot take my dog to a noisy environment and with the current and planned work on Perrymount Road; the Aldi, followed by the new Clair Hall development, I will have to give Clair Park a miss. There is Hickman's Lane, but this is not extensive, and not at all safe for letting dogs off the lead.

As a resident of Sunte Close I also have grave concerns about the potential flooding risk should 49 houses be built on Wickham Way. Since the building of the Sunte Park development I have seen increasing amounts of surface water on the road in Sunte Close. This is of particular concern as in recent years in very rainy periods water has come almost to my door. We had to take the decision a couple of years ago to install drainage across the front of our drive which cost in excess of £2,000; but there are still many times where this barely takes care of the volume of water coming down the road. I cannot believe that adding more non-permeable surface in the locality is not going to make this worse.

Other infrastructure concerns also come to mind. South-East Water is unable to keep up with existing customer demand as recent water stoppages in Hurstpierpoint and other localities have

proved. How will South East Water deal with additional demands for tap water?

We are registered with Dolphin's Practice and have found it increasingly difficult to get appointments in recent years; when we do get an appointment it is likely that the GP is running well behind (I waited 40 minutes past my appointment time last time I attended for a GP appointment). The Practice is, I believe, doing everything it can but is drowning under sheer weight of numbers. From the reports of friends and neighbours other local practices are under similar pressure.

Finally, I would like to reiterate that this is not 'just a field'. It is a well-used community resource with a rich and sustained level of wildlife and plants..

Kind regards
