Address: 50 Woodland Avenue Burgess Hill

Comments Details

Commenter Type: Neighbour or general public

Stance: Customer made comments in support of the Planning Application

Reasons for comment:

Comments: This is a critical building for the town of Burgess Hill, and the extensions main focus is to make an old building comply with disability access and anti disability discrimination. So anyone with mobility issues can access the vast majority of the building and use toilet facilities throughout the building. This building has a focus on supporting the youth, an age group that has very little

indoor spaces around town focused on them. It will complement the existing building while bringing essential modern day needs infrastructure. It's central location to the town yet closeness to St.johns park means it can be a supporting indoor venue to daytime social events in the park throughout the year, while also being able accessed by many through walking from all corners of burgess hill or public transport. This is a hugely important asset to the town that needs to be utilised to help the youth to develop their social skills within a safe space.

Kind regards
