Reasons for comment:

Comments:

Why is there so commotion over the windows we have had wooden windows for 26 yrs. Its now the 21st century upvc r the future our neighbours have had upvc windows for 20yrs in turnpike crt so what is the problem with our estate. If the flats have been approved why have not the property's 1-2-4-5-6-7-8-9 .in the long run its better for the environment as no painting will be needed plus our wooden windows let all of the heat out as they r rotten been painted 4 times and lasted 3 months now the paint is coming off again .let's thing about the future no painting no escape heating lasting longer the wood as we suffer with a lot of black mould on the windows. So I do not want 50/50 wooden at the front and upvc at the back .DO NOT WANT WOODEN WINDOWS

Kind regards
