Commenter Type: Neighbour or general public

Stance: Customer made comments in support of the Planning Application

Reasons for comment:

Comments: Hello,

Regarding the proposed planning application DM/26/0837.

We are supportive of our neighbour's proposed development.

The proposal is making effective use of land.

Drawing 0505 PL 01 states "Garden to #56" in a few places.
Whilst this is correct for the location to the South of #58 adjacent

to the Garage and driveway. The portion to the South of #58s garden is the garden for #54, not #56. The plot plan does depict a wall running North / South that is the boundary for #56 and #54.

Given the proximity and the limited size of our outdoor space (at #56), I am interested about the position of the mechanical extraction and associated external penetration, as this may affect residential amenity, particularly in terms of potential noise, vibration, and odour, as we would not have opportunity to avoid this in any part of our garden. The position and orientation of the extraction equipment are not detailed within the application, I would be very grateful if it could be considered whether the extraction outlet could be positioned to face away from the neighbouring gardens.

Thank you

Kind regards
