Subject: DM/25/0589 - Objection

[REDACTED]

I am writing to register my objection to planning application DM/25/0589.

The size of the mast, over 30M together with the associated compound, is not suitable for the residential area proposed. It would be an unacceptable eyesore in a beautiful green corridor links to the Beadlands nature reserve. This space is used by local residents as a pleasant walk to and from Wivelsfield station, for dog walking and spotting the numerous animals and birds that can be found there. With the amount of previously open spaces now under construction in Burgess Hill, surely we should be taking care of the remaining natural habitat. It is obvious that the erection of this mast will disturb not only the wildlife but anyone using the area, and once completed, the continuing noise and the radiation will continue to impact residents, school children and businesses as well as the flora and fauna.
