Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I am deeply concerned about the environmental impact on local wildlife this application will have if it goes ahead, as well as the compound making for an extremely ugly view; my family and neighbours are privileged enough to live next to this gorgeous little meadow, which many of us can view directly through our windows

and walk through regularly.

The meadow is, I believe, protected alongside Bedelands nature Reserve as an SNCI, and is home to all sorts of native wildflowers and insects, which feed our local bat population throughout the year; I believe that disrupting this piece of land will have a negative impact on our local bats.

I am also concerned about the installation of 5G towers so close to residential and natural areas; the technology is new and we have very little evidence as to what long-term exposure to 5G can do to people's health. As someone who lives right next to the meadow where the application concerns, I am worried about the impact these towers may have on my family's health.

Kind regards
