Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I strongly object to this application of which the main purpose appears to be to supply connectivity to train passengers on a relatively short stretch of rail track. The scale and height of this mast would tower well above the tree line and would be an eye sore for most residents in a vast area. It would be out of character with the Council's own promotion of the surrounding area as being 'rural'. It would be next to an ancient, protected woodland where

owls, badgers and foxes roam together with a wide variety of bird life and birds of prey such as buzzards. It is believed that wireless radiation has a harmful impact on birds, bees and bats and other wildlife that live close to these masts.
The mast would have little or no positive impact on the residents around it.

Kind regards
