Date: 21 April 2026

By email only: Planning Department, planninginfo@midsussex.gov.uk

Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Mid Sussex District Council planning decisions with regard to potential ecological impacts from development.

Application: DM/26/0764
Location: Franc Jean Farm The Street Bolney Haywards Heath
Proposal: Proposed single dwelling (self/custom build)

Thank you for consulting Place Services on the above application.

No ecological objection	☐
No ecological objection subject to attached conditions	☒
Further information required/Temporary holding objection	☐
Recommend Refusal	☐
Subject to Natural England's formal comments on the conclusion of the LPA's Appropriate Assessment	☐

Summary

We have reviewed the Preliminary Ecological Appraisal (Phlorum Limited, January 2026) relating to the likely impacts of development on designated sites, protected and Priority species & habitats and identification of appropriate mitigation measures and mandatory Biodiversity Net Gain.

We have also reviewed the information submitted relating to mandatory biodiversity net gains, including the Self-build and Custom Build Statement (March 2026) and Application Form.

We note from the Preliminary Ecological Appraisal (Phlorum Limited, January 2026) that Buildings B1 (wooden shed), B2 (disused wooden building) and B3 (open air wooden shed) all have negligible bat roost potential. We also understand from the Part 1 Tree Report (BioRegional Forestry Ltd., January 2026) that no trees will be removed during the development. Therefore, we agree that no further surveys for bats are required.

We also support the Precautionary Method Statement for mobile protected and Priority species (including Hedgehog, which is a protected and threatened species) in Section 5.22 of the Preliminary Ecological Appraisal (Phlorum Limited, January 2026). This should be secured by a condition of any consent and implemented in full.

We are satisfied that there is sufficient ecological information available to support determination of this application. However, please note that we have no comments on Great Crested Newt as we have been instructed to leave comments on this European Protected Species to the NatureSpace Partnership. We recommend that the NatureSpace Partnership is consulted on this application.

This provides certainty for the LPA of the likely impacts on designated sites, protected and Priority species & habitats and, with appropriate mitigation measures secured, the development can be made acceptable.

The mitigation measures identified in the Preliminary Ecological Appraisal (Phlorum Limited, January 2026) should be secured by a condition of any consent and implemented in full. This is necessary to conserve and enhance protected and Priority species particularly those recorded in the locality, including bats and mobile protected and Priority species.

With regard to mandatory biodiversity net gains, it is highlighted that we have reviewed the submitted Self-build and Custom Build Statement (March 2026) and Application Form. Applications are required to deliver a mandatory 10% measurable biodiversity net gain, unless exempt under [paragraph 17 of Schedule 7A of the Town and Country Planning Act 1990](#) and the [Biodiversity Gain Requirements \(Exemptions\) Regulations 2024](#). As a result, we have reviewed the submitted details and are satisfied that this application is exempt, as the proposal is for one self-build dwelling for an area less 0.5 ha. A condition may be considered necessary to be imposed by the council to ensure that the development must be occupied by a person or persons who had a primary input into the design and layout of the dwelling and who will live in the dwelling for at least 3 years.

We also support the proposed reasonable biodiversity enhancements for protected, Priority and threatened species, which have been recommended in the Preliminary Ecological Appraisal (Phlorum Limited, January 2026) to secure net gains for biodiversity, as outlined

under Paragraph 187d and 193d of the National Planning Policy Framework (December 2024). The reasonable biodiversity enhancement measures should be outlined within a separate Biodiversity Enhancement Layout and secured by a condition of any consent.

This will enable LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended) and delivery of mandatory Biodiversity Net Gain.

Impacts will be minimised such that the proposal is acceptable, subject to the conditions below based on BS42020:2013. We recommend that submission for approval and implementation of the details below should be a condition of any planning consent.

Recommended conditions

1. ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS

“All mitigation measures and/or works shall be carried out in accordance with the details contained in the Preliminary Ecological Appraisal (Phlorum Limited, January 2026) as already submitted with the planning application and agreed in principle with the local planning authority prior to determination. This includes the Precautionary Method Statement for mobile protected and Priority species in Section 5.22 of the Preliminary Ecological Appraisal (Phlorum Limited, January 2026), which avoids impacts on protected species.

This may include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details.”

Reason: To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

2. PRIOR TO ANY WORKS ABOVE SLAB LEVEL: BIODIVERSITY ENHANCEMENT LAYOUT

“A Biodiversity Enhancement Layout for biodiversity enhancements listed in the Preliminary Ecological Appraisal (Phlorum Limited, January 2026) shall be submitted to and approved in writing by the local planning authority.

The content of the Biodiversity Enhancement Layout shall include the following:

- a) detailed designs or product descriptions for biodiversity enhancements; and*

- b) *locations, orientations and heights for biodiversity enhancements on appropriate drawings.*

The enhancement measures shall be implemented in accordance with the approved details prior to occupation and all features shall be retained in that manner thereafter.”

Reason: To enhance protected, Priority and threatened species and allow the LPA to discharge its duties under paragraph 187d of NPPF 2024 and s40 of the NERC Act 2006 (as amended).

Please contact us if you have any queries in relation to this advice.

Your sincerely,

Hamish Jackson ACIEEM BSc (Hons)
Senior Ecological Consultant
 Place Services at Essex County Council

Place Services provide ecological advice on behalf of Mid Sussex District Council.

Please note:

This letter is advisory and should only be considered as the opinion formed by specialist staff in relation to this particular matter.

We are unable to respond directly to applicants/agents or other interested parties. Any additional information, queries or comments on this advice that the applicant/agent or other interested parties may have, must be directed to the Planning Officer at the relevant LPA, who will seek further advice from us where appropriate.
