[REDACTED]

Dear Sir/Madam

I wish to register my objection to the above planning application, in relation to the first floor dormer side elevation.

I have no objection to the replacement garage on the above planning application.

My objections are that this side elevation will reduce my light currently to the side of my property. Also, my bedroom is directly below this side elevation (my property is a bungalow) & the proposed windows would directly view into my bedroom, which I find completely unacceptable. This would be a complete invasion of my privacy & I oppose this side dormer in the strongest of terms.

I sincerely hope that these views can be considered.

Yours faithfully
