

P1 Tree location and pruning plan

12 Hickmans Lane, Lindfield, Haywards Heath RH16 2BL | TPO LF/01/TPO/09

Protected trees

- A** Left-hand tree marker beside garage
- B** Upper-right tree marker beside house

Branches to be pruned

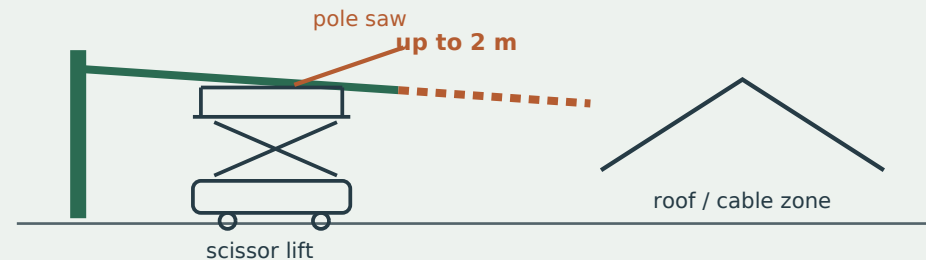

For A and B, reduce only the lower branches growing towards or over the garage roof, main house roof and the overhead internet cable between garage apex and house.

Shorten these lower laterals by up to 2 m from their current extension, to suitable branch unions. Target about 2 m separation from the roofs and cable where feasible within that limit. Retain main limbs and upper crowns.

Proposed access and tool

Scissor lift and pole chainsaw operated within 12 Hickmans Lane by a competent tree surgeon. No work, equipment or cuttings on the council path. Contractor to check ground and cable clearances.

Access sketch (schematic elevation)

Sketch based on applicant-supplied TPO checker map. Not to scale; branch extents and cable route to be confirmed on site.
