

This architectural elevation drawing shows a section of a building facade. On the left, a brick wall features a window with a dark frame and two panes. A small figure is visible inside the window. To the right of the window is a vertical section with horizontal siding. Above this section is a horizontal band with horizontal siding, labeled 'R/F' in a small box. The roofline is visible on the right, showing a gable with a chimney and a dormer window. The drawing is annotated with three numbered circles: (1) points to the vertical siding, (2) points to the horizontal siding above the window, and (3) points to the window frame. The background includes a stylized representation of trees and a fence.
