**BY EMAIL ONLY**

Dear Anna Tidey,

**Planning consultation:** Proposal to convert the existing commercial space into a self-contained residential flat, extend the current one-bedroom ground floor flat into a two-bedroom unit, install seven rooflights in the rear existing commercial space, add a new door and window on the side elevation, and raise the single-storey roof to match the existing structure. Remove garage door to provide parking spaces and bin store at front of property.

**Location:** S Taylor Jewellers 30 Cantelupe Road East Grinstead West Sussex RH19 3BJ.

Thank you for your consultation on the above dated 01 April 2025 which was received by Natural England on the same date.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

**DESIGNATED SITES [EUROPEAN] – NO OBJECTION SUBJECT TO SECURING APPROPRIATE MITIGATION**

This advice relates to proposed developments that falls within the 'zone of influence' (ZOI) for one or more European designated sites, such as Ashdown Forest Special Protection Area (SPA) and Special Area of Conservation (SAC). It is anticipated that new residential development within this ZOI is 'likely to have a significant effect', when considered either alone or in combination, upon the qualifying features of the European Site due to the risk of increased recreational pressure that could be caused by that development. On this basis the development will require an appropriate assessment.

Your authority has measures in place to manage these potential impacts in the form of a strategic solution. Natural England has advised that this solution will (in our view) be reliable and effective in preventing adverse effects on the integrity of those European Site(s) falling within the ZOI from the recreational impacts associated with this residential development.

This advice should be taken as Natural England's formal **representation on appropriate assessment** given under regulation 63(3) of the Conservation of Habitats and Species Regulations 2017 (as amended). You are entitled to have regard to this representation.

Natural England advises that the specific measures (including financial contributions) identified in the strategic solution can prevent harmful effects from increased recreational pressure on those European Site within the ZOI.

Natural England is of the view that if these measures are implemented, they will be effective and sufficiently certain to prevent an adverse impact on the integrity of those European Site(s) within the ZOI for the duration of the proposed development.

The appropriate assessment concludes that the proposal will not result in adverse effects on the integrity of any of the sites as highlighted above (in view of [its conservation objectives](#)) with regards to recreational disturbance, on the basis that the strategic solution will be implemented by way of mitigation.

Having considered the assessment, and the measures proposed to mitigate for all identified adverse effects likely to occur as a result of the proposal, Natural England advises that we concur with the assessment conclusions. If all mitigation measures are appropriately secured, we are satisfied that there will be no adverse impact on the sites from recreational pressure.

If the Habitats Regulations Assessment (HRA) has not been produced by your authority, but by the applicant, it is your responsibility (as the competent authority) to produce the HRA and be accountable for its conclusions. We provide the advice enclosed on the assumption that your authority intends to adopt this HRA to fulfil your duty as competent authority.

**Natural England should continue to be consulted on all proposals where provision of site specific SANGS (Suitable Alternative Natural Green Space) or other bespoke mitigation for recreational impacts that falls outside of the strategic solution is included as part of the proposal. We would also strongly recommend that applicants proposing site specific infrastructure including SANGs seek pre application advice from Natural England through its Discretionary Advice Service. If your consultation is regarding bespoke site-specific mitigation, please reconsult Natural England putting 'Bespoke Mitigation' in the email header.**

Reserved Matters applications, and in some cases the discharge/removal/variation of conditions, where the permission was granted prior to the introduction of the Strategic Solution, should also be subject to the requirements of the Habitats Regulations and our advice above applies.

Further general advice on the consideration of protected species and other natural environment issues is provided at Annex A.

For any queries regarding this letter, for new consultations, or to provide further information on this consultation please send your correspondences to [consultations@naturalengland.org.uk](mailto:consultations@naturalengland.org.uk).

Yours sincerely

Victoria Sweeney
