

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

☐ No

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

Planting of mixed scrub has supplied a large portion of the biodiversity net gain

6.1 Survey date

For example, 3/11/2023

19th January, 2025

6.2 Survey constraints

For example, access issues, weather, or seasonal constraints.

The optimal time period to complete condition assessments is between April and September, this survey of the site was completed outside of this window in January 2025. This though is not considered a limitation of the assessment due to habitats on site being common and widespread, and the dominant species of the respective vegetation types were visible and identifiable.
