

New Porch and Rear Dormer Extension at 41 College Lane, Hurstpierpoint, West Sussex, BN6 9AD**1.0** Project Scope:

41 College Lane is a semi-detached, dormer bungalow located on College Lane in Hurstpierpoint. The house, built in 1986, sits on a corner plot, where College Lane (unadopted) turns to the north to provide driveway access to two large, detached properties to the north, and access to No.41's own driveway and garage at the end of No.41's garden. The principal elevation faces south.

This application covers the following exterior alterations:

- Ground floor kitchen window enlargement on the east elevation.
- Ground floor porch addition on the east elevation for coat and boot storage.
- First floor replacement dormer on the rear (north) elevation, with one full-width dormer replacing two original smaller dormers. The new dormer will greatly improve the bedroom spaces, by almost completely removing the sloped skellings in these two rear facing bedrooms.

3.0 Planning Context:

- Green Belt: No
- Conservation Area: No
- Listed Building: No
- Tree Preservation Order: No

4.0 Planning History:

A small 9m² single-storey, ground floor rear extension was added to the house in around 1989. A planning reference can't be found for this addition in the Mid-Sussex planning website.

5.0 Permitted Development Statement:

The proposed full-width dormer complies with Class B of the Permitted Development Rights for Householders guidance:

- The height of the new dormer will be lower than the highest part of the existing ridge line (B.1.b)
- The dormer is on the rear elevation, and it does not extend beyond the plane of the roof forming the principal elevation fronting the highway (B.1.c)
- The increase in cubic content after construction of the new dormer will be less than 50m³ (B.1.d)
The existing dormers are original. Each existing dormer is 6.96m³. Removal of two dormers therefore reduces the original roof volume by 13.92m³.
The proposed wider dormer has a volume of 19.18m³.
The resulting increase in cubic content is therefore +5.26m³.
- No verandah, balcony or roof terrace is proposed (B.1.e)
- The site is not on Article 2(3) land (B.1.f)
- The materials proposed will be of similar appearance to those of the existing dwelling (B.2.a)
- No new windows are proposed on the side elevations (B.2.c)

The proposed porch complies with Class D of the Permitted Development Rights for Householders guidance for porches:

- The porch footprint, measured externally, will be less than 3m² (D.1.b)
- The eaves will be no higher than 3m over ground level (D.1.c)
- No part of the structure will be within 2 metres of any boundary of the curtilage with a highway (D.1.d)
