Subject: RE: DM/26/0732

Dear Dermot,

The extension of time is agreed until 4th September to enable the following information to be submitted:

C5 Drainage: Design turnaround underway with a target production week commencing 13 July.

C15 CEMP Biodiversity: Is pending final review.

C21 Risks from land contamination: The Phase 1 Environmental Desk Study has been commissioned. The report to be uploaded later this month.

Once the above information has been submitted I will need to reconsult the relevant consultees, who may require further information before the conditions can be discharged.

Kind Regards
