1<sup>st</sup> December 2024

Mr A Horrell  
Planning Application Dept  
Mid Sussex

Dear Mr Horrell,  
Re Application no DM/24/2785

Further to your letter informing me of the proposed works for 10 Sergison Close, I would confirm that providing the workmen for this project and the owners and anyone else to do with this project do not use the cul-de-sac at 7&9 Heatherbank, which have single yellow lines, between the hours of 9-10 and 1-2, then I do not have an objection to the work. The property has its own cul-de-sac but as it is slightly smaller, the workmen and owners may think it is easier to park in the cul-de-sac near 9 Heatherbank and this needs to be addressed before planning is granted.

In the past, workmen at other houses have used the Heatherbank cul-de-sac against the rules of the single yellow line and parking enforcement notice which causes problems with entry and exit from mine and my nextdoor neighbour's drives. These have been reported and workmen and owners who left their vehicles there at the excluded times, have been fined. It also causes problems for large delivery vehicles and the refuse bin collections.

It is enough that we have to put up with more noise and dust but the rule is no parking at certain times and I would want to know that this will be adhered to. Unfortunately we had to request parking restrictions a few years ago because people were using it to park for the Railway station, Gatwick Airport holidays and the businesses in Haywards Heath town centre which caused access problems. We have also had problems with power and water constructions which have caused access problems so although this may seem of little problem to the planning department, it does have a huge potential problem for myself and others – I know that the owner of no 7 Heatherbank would be of the same opinion but it is rented out so she has little contact with what may happen in the cul-de-sac these days as she does not live there.

[REDACTED] if you have anything you wish to discuss with me.

Yours sincerely
