Address: 6 Aster Way Haywards Heath

Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I strongly object to the planning application DM/25/3129 on the following grounds 1. The proposal will cause significant harm to the surrounding sensitive natural landscape of the area, far outweighing the benefit. The site is immediately adjacent to the High Weald and will adversely impact views and tranquility. 2. The existing local infrastructure, amenities such as doctors and

schools, cannot support this size of development

3. The enlargement of the roundabout at the point of access to the development will result in increased traffic speeds, pollution and noise. All roads leading to the proposed larger roundabout are single lane country roads and increasing the roundabout seems to serve little purpose yet will negatively impact the immediate area. Additionally the local road network is already over capacity during peak times. Not to mention the proposed removal of several large Oak trees.

5. Proposal conflicts with Policy DP4 (Housing) - the development is not suitably placed

6. The proposed site is immediately adjacent to the Borde Hill Estate which is Grade II listed. The scale and proximity of the development will harm the character of this valuable site

7. As witnessed this year Ardingley reservoir cannot cope with the current number of properties and therefore the development will result in further pressure on water supplies.

8. The land proposed for development already suffers flooding and the since of development will increase flood risk in the immediate area. The size of development significantly increasing hard surfaces resulting in increased run off.

9. The site is not in the district plan.

10. There is no constant pedestrian pathway along Balcombe Road and paths are narrow and not safe.

11. Wildlife - there are door mice and bats, kites and many other valuable wildlife are present on the site. As someone who values wildlife I feel the development will significantly impact biodiversity and therefore local resident wellbeing. Light pollution will further negatively impact biodiversity.

Kind regards
