Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	I am writing in support of the retrospective planning application for the replacement fence at the above property. I am a regular visitor to the Wilderness and am familiar with the site and its surroundings. The previous fence had clearly deteriorated over time and was in a poor, rotten condition. In contrast, the new fence represents a significant improvement in both appearance and condition. It is well-constructed, visually tidy, and far more in keeping with the character of the area than the fence it replaces.

From the perspective of someone who regularly uses and enjoys the Wilderness, the new fence has had a positive impact on the immediate environment. It appears safer, more durable, and better maintained, contributing to a more cared-for and orderly boundary without detracting from the natural character of the area.

I also strongly support the proposed new planting in front of the property. This planting will soften the appearance of the fence, enhance biodiversity, and further integrate the boundary into the surrounding landscape. In my view, this will only enhance the visual amenity of the area and improve the experience for visitors.

For these reasons, I believe the replacement fence and associated planting represent a clear improvement over the previous situation, and I respectfully support the approval of this retrospective planning application.

Kind regards
