Dear Stefan,

The Flood Risk and Drainage Team has no objection to this proposed development, subject to a permeable surface being utilised as stated in the application documents of DM/25/0593.

Drainage can be managed via Building Regulations and Building Control, as necessary.

We would advise the Applicant that this development is in an area of increased surface water flood risk. The applicant should ensure this existing flood risk is not exacerbated on or off site.

Best Wishes

Flood Risk and Drainage Team
Estate Services and Building Control
