

# AT&C

Arborist Training & Consultancy Ltd

AT&C have been commissioned to provide a report on a Pinus spp tree located in the rear garden of property Hillside, North Street, Turners Hill RH10 4NS

## **The inspection**

The inspection of the tree was carried out on 06/12/24 in clear conditions By George Frame a LANTRA qualified professional tree inspector. The tree was inspected above ground and from ground level only with visual aids, no aerial inspection was carried out.

## **The Trees**

The trees are 1x Pinus spp tree situated in the front garden of the property.

## **Tree Health and findings**

The tree is leaning at approximately 40 degrees over the driveway of the Pump House and North Street. There are limbs with tight forks and included bark and I have concerns that the tree could fail completely or in part.

## **Recommendations**

Due to the lean and tight forks referred to above it is my opinion that the tree should be removed in its entirety for safety reasons.

On behalf of AT&C
