Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Mid Sussex District Council planning decisions with regard to potential ecological impacts from development.

Application: DM/26/1225
Location: Down Park Place Turners Hill Road Crawley Down Crawley West
Sussex RH10 4HQ
Proposal: Erection of self build 2 bedroom single storey dwelling with car port

Thank you for consulting Place Services on the above application.

No ecological objection	☐
Recommend approval subject to attached conditions	☐
Further information required/Temporary holding objection on: • European Protected Species (bats)	☒
Recommend Refusal	☐
Subject to Natural England's formal comments on the conclusion of the LPA's Appropriate Assessment	☐

Summary

We have reviewed the documents supplied by the applicant, including the information submitted relating to mandatory biodiversity net gains, including the Habitat Management and Monitoring Plan (Echological Ltd., April 2026), Biodiversity Net Gain (Echological Ltd., February 2025) and Statutory Biodiversity Metric (pdf sheets).

We are not satisfied that there is sufficient ecological information available for determination of this application and recommend that details of survey results, mitigation & enhancement measures are required to make this proposal acceptable/additional information on bats s provided prior to determination. The reasons for this are outlined below:

European Protected Species: bats

It appears from the Biodiversity Net Gain (Echological Ltd., February 2025) that a pre-existing outbuilding will be demolished. Therefore, there may be impacts to roosting bats and we recommend that a Preliminary Roof Assessment for bats is undertaken. This type of assessment can be undertaken at any time of the year.

To fully assess the impacts of the proposal the LPA needs ecological information for the site, particularly for bats and Great Crested Newt (GCN), European Protected Species. These surveys are required prior to determination because [Government Standing Advice](#) indicates that you should “*Survey for bats if the area includes buildings or other structures that bats tend to use or there are trees with features that bats tend to use nearby*”.

The results of these surveys are required prior to determination because paragraph 99 of the ODPM Circular 06/2005 highlights that: “*It is essential that the presence or otherwise of protected species, and the extent that they may be affected by the proposed development, is established before the planning permission is granted, otherwise all relevant material considerations may not have been addressed in making the decision.*”

This information is therefore required to provide the LPA with certainty of likely impacts on legally protected species and be able to secure appropriate mitigation either by a mitigation licence from Natural England or a condition of any consent. This will enable the LPA to demonstrate compliance with its statutory duties, including its biodiversity duty under s40 NERC Act 2006 (as amended) and prevent wildlife crime under s17 Crime and Disorder Act 1998.

Furthermore, the Local Planning Authority, as a competent authority, should have regard to the requirements of The Conservation of Habitats and Species Regulations 2017 (as amended) when reaching planning decisions including the Favourable Conservation Status licensing test and must not leave this until the licence application stage. Therefore, if a European Protected Species Mitigation Licence is required for this application, appropriate

mitigation measures to support the provision of the licence must also be outlined prior to determination to allow certainty to the LPA that a licence will likely be granted.

This is needed to enable the LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended).

Additional comments - Mandatory Biodiversity Net Gains:

Applications are required to deliver a mandatory 10% measurable biodiversity net gain, unless exempt under [paragraph 17 of Schedule 7A of the Town and Country Planning Act 1990](#) and the [Biodiversity Gain Requirements \(Exemptions\) Regulations 2024](#). As a result, we have reviewed the submitted details and are satisfied that this application is exempt, as the proposal is for one self-build dwelling for an area less 0.5 ha. A condition may be considered necessary to be imposed by the council to ensure that the development must be occupied by a person or persons who had a primary input into the design and layout of the dwelling and who will live in the dwelling for at least 3 years.

Biodiversity net gains is a statutory requirement set out under [Schedule 7A \(Biodiversity Gain in England\) of the Town and Country Planning Act 1990](#). This legislation was inserted into the 1990 Act by Schedule 14 of the Environment Act 2021, and was amended by the Levelling Up and Regeneration Act 2023. The Biodiversity Gain (Town and Country Planning) (Consequential Amendments) Regulations 2024 made consequential amendments to other parts of the 1990 Act.

Additional comments:

We also recommend that reasonable biodiversity enhancements for protected, Priority and threatened species should be identified by a suitably qualified ecologist and implemented to secure net gains for biodiversity, as outlined under Paragraph 187d and 193d of the National Planning Policy Framework (December 2024). The reasonable biodiversity enhancement measures need to be outlined within a separate Biodiversity Enhancement Strategy and secured by a condition of any consent.

Please note that we have no comments on Great Crested Newt as we have been instructed to leave comments on this European Protected Species to the [NatureSpace Partnership](#).

We look forward to working with the LPA and the applicant to receive the additional information required to support a lawful decision and overcome our holding objection.

Please do not hesitate to contact us if you have any queries in relation to this advice.

Yours sincerely,

Hamish Jackson ACIEEM BSc (Hons)
