Hi Stefan,

As discussed, I'm concerned that noise from the proposed courts could adversely affect the amenity of residents nearby. Acoustic reports submitted to support other similar applications have shown that the introduction of padel courts to an area have the potential to increase noise levels, and have suggested mitigation such as acoustic barriers. Can the applicants provide an acoustic report to demonstrate how the development will affect amenity.

Please can the applicant also provide further details regarding the lighting scheme. What I am trying to establish is whether or not any residents in the locality will be affected by the proposed lighting. I would consider this to be an E3 zone, and would therefore like to know the predicted illuminance (in lux), in the vertical plane at the windows of dwellings in the vicinity so that I can assess any impact from the proposed lights.

It would also be useful to know the days and hours of proposed use for the courts.

Kind regards,
